wasabi The AI Storage Cloud | WEKA®

SOLUTION BRIEF

WEKA + Wasabi | Object Direct

Land Data Economically. Accelerate AI When It Matters.

Build a scalable foundation for AI data without making every byte a premium storage investment.

The challenge

Artificial intelligence (AI) initiatives are driving unprecedented growth in unstructured data. Images, video, sensor information, documents, and training datasets must be collected and retained before organizations can determine how and when that data will be used.

Traditional approaches often require data to land on expensive infrastructure before it is processed, creating unnecessary storage costs and limiting scalability.

Organizations need an economical way to ingest and retain massive datasets while maintaining a path to high-performance AI processing.

The WEKA + Wasabi solution

WEKA and Wasabi enable a flexible AI data architecture that separates cost-effective data ingestion and storage from high-performance processing.

When datasets are required for AI training, inference, or analytics, supported data movement workflows can make that information available to WEKA NeuralMesh, where applications benefit from high-performance data access.

Together, WEKA and Wasabi help organizations avoid unnecessary premium storage investments while supporting the data-intensive demands of modern AI infrastructure.

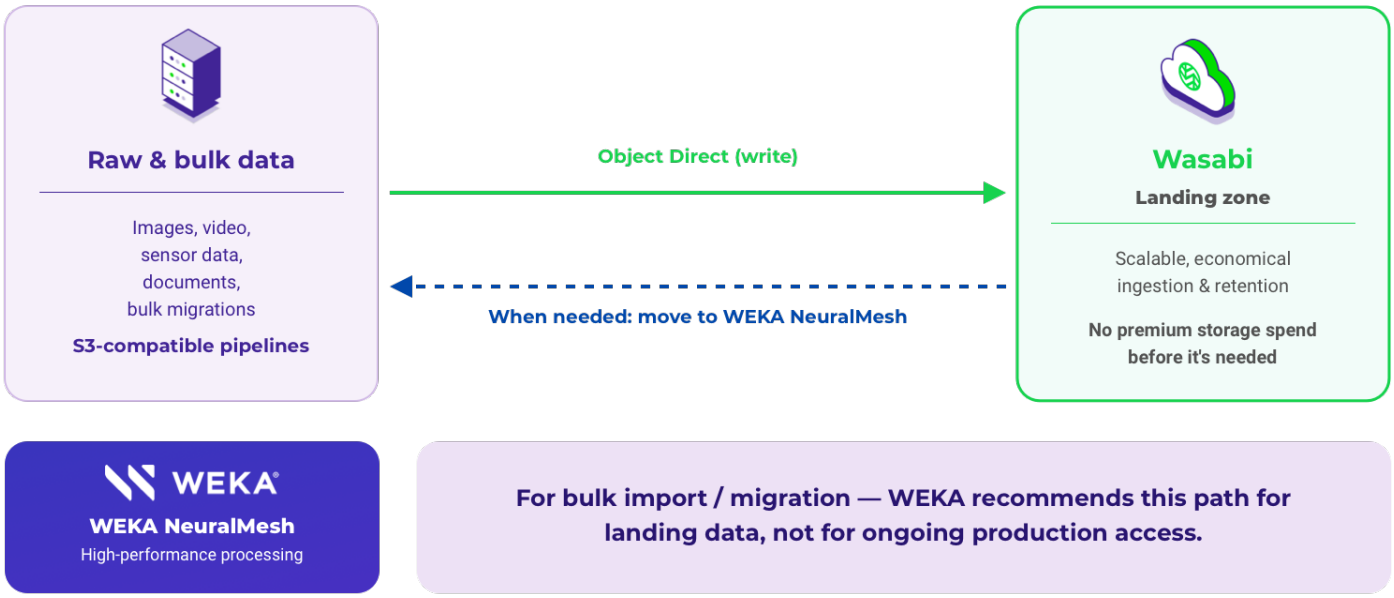

Benefits

- Ingests at scale, economically
- Lowers AI infrastructure spend
- Achieves AI readiness faster
- Decouples storage from compute
- Better predicts storage costs

Use cases

- AI data factories
- Raw training datasets
- Video analytics
- Autonomous systems
- Research data lakes
- IoT ingestion
- Multimodal AI pipelines

The bottom line

Keep all the data you need. Accelerate only what matters.

WEKA and Wasabi help organizations build scalable AI data foundations that balance high-performance computing requirements with long-term storage economics.

ABOUT WASABI

Wasabi provides simple and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data with no complex tiers or egress or API fees, delivering predictable costs that save money and industry leading security and performance businesses can count on. Trusted by customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston. Wasabi is a Proud Partner of the Boston Red Sox, and the Official Cloud Storage Partner of Liverpool Football Club and the Boston Bruins.
