

Wasabi and Hivelocity - Simple Storage Meets Powerful Hosting to Drive Innovation at a Lower Cost

Overview

Cloud computing has been growing consistently since it became part of many companies' innovation strategy. The challenge has been finding affordable alternatives to the hyperscaler mega clouds that dominate the landscape. Wasabi and Hivelocity, two independent IaaS providers, have partnered to offer a compelling option with better performance and lower costs.

Hivelocity is a leading provider of fast and affordable bare metal server platforms, with tens of thousands of dedicated servers, virtualized servers, and private cloud solutions. With 40 locations, operating in 26 countries, across 6 continents Hivelocity's bare metal can reach 80% of the world's internet population in under 25 milliseconds for unprecedented compute power and speed.

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All Hivelocity and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster inline reads and recall times.

KEY FEATURES

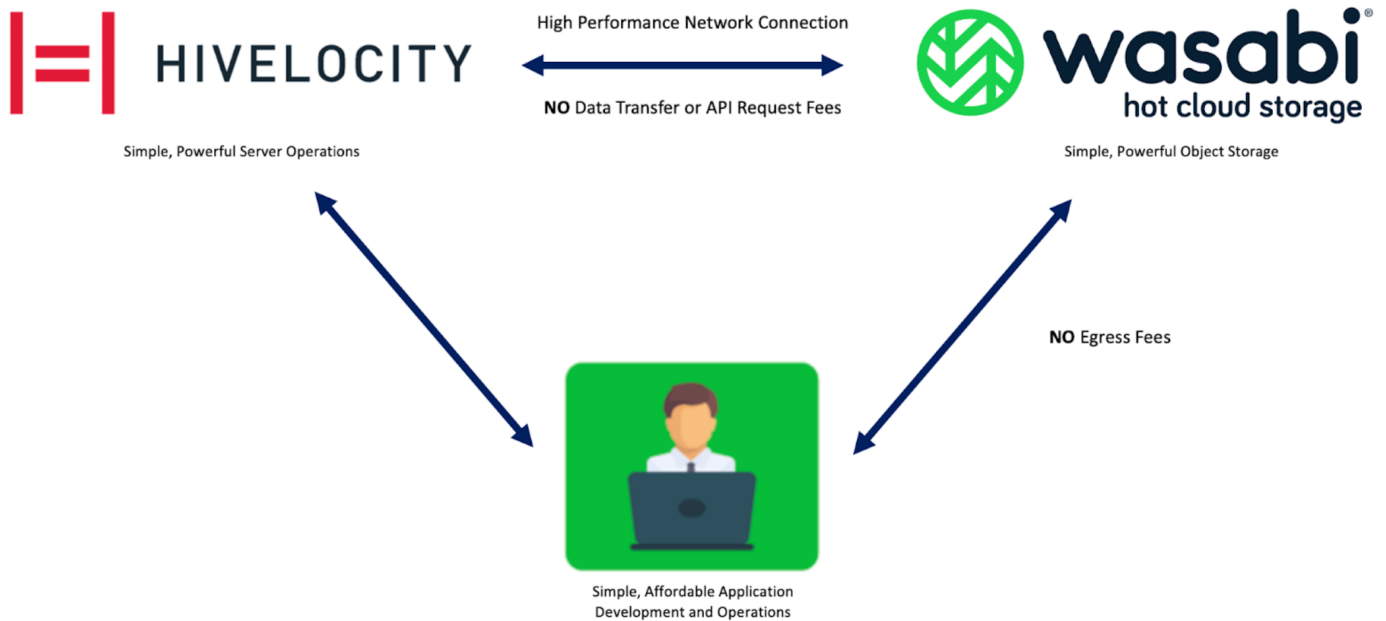

- Broadly Distributed Edge locations
- Bare metal computing with maximum flexibility
- Instant deployment and provisioning globally
- Simple, secure operating environment
- GUI Console & REST API
- Rapid Restore for System Images

USE-CASES

- Application Development & Operations
- Backup to the Cloud
- Content Delivery
- Data Capture and Analysis
- Disaster Recovery in the Cloud
- Media Transcoding and Archiving
- Multiplayer Gaming
- Video Surveillance

BENEFITS

- High performing dedicated servers
- Single tenant security
- Predictable costs for compute and object storage
- No egress or API fees for storage access
- Single tier, hot storage for high-performance requirements
- Single interface for managing all system elements
- Single billing for all services

Wasabi and Hivelocity share a desire to simplify cloud infrastructure operations while reducing costs so that their customers can focus their efforts on insights and innovation, not decyphering complicated invoices meant to confuse and camouflage excessive billing. The workloads supported by this collaboration span a broad spectrum, from backup & recovery to analytics to media workflows and archiving. With this partnership mutual customers can quickly and easily spin up their applications and store/analyze their data knowing exactly how much they'll spend for any given period of time. This predictability empowers developers and operations teams working within limited budgets to maximize their return on investment in terms of time, effort, and dollars.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
