

# The Winning Combination Of Affordable Cloud Storage And Better, Faster File Transfer

Professionals working with video and those who regularly transfer very large files to customers and clients across a city or the world face a common problem: how do I make sure the files arrive safely and on-time without breaking the bank?

Wasabi has partnered with MASV to help video professionals drastically reduce the costs associated with transferring and storing large files. Unlike other file transfer solutions, MASV offers pricing plans to fit users' needs. With options like pay-as-you-go, at just \$0.25/GB, only pay for what you use, or MASV Professional Plan, monthly subscription starting at \$40/month, which offers a 20% cost savings at \$0.20/GB.

Wasabi provides the cloud capacity to store all your content files—from raw footage to finished product ready for distribution to archived libraries for future reference—and MASV helps you get it there faster and more cost-efficiently than the competition. Plus, MASV's transfer performance means you'll always get the fastest available network speeds, so you can rest assured your files will arrive on time.

The MASV cloud connection to Wasabi can be set up with just a few clicks. Try it today and get 30 days free from Wasabi and a free trial from MASV.

## Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All MASV and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.
