

Dell PowerProtect Portfolio with Cloud Tier and Wasabi Hot Cloud Storage

Data Protection with Fast, Simple, and Secure Long Term Retention in the Cloud

Data growth is doubling every year in many businesses, creating operational and financial challenges for their IT organizations. Conventional on-site storage solutions are becoming frequently overwhelmed by data sprawl, and first-generation cloud storage services are too expensive and complex to scale and maintain.

Dell Technologies has partnered with Wasabi to help organizations reduce storage cost and complexity, tackling exponential data growth with PowerProtect appliances, PowerProtect Data Manager software, Cloud Tier as well as Wasabi hot cloud storage.

PowerProtect Portfolio Easily Tiers Data to Wasabi Hot Cloud Storage to Reduce Cost and Complexity

The PowerProtect portfolio with Cloud Tier helps secure mission critical applications and meets the needs of emerging workloads, wherever they are located. Now you can send your data directly from PowerProtect to Wasabi as a validated and supported cloud object storage provider for long-term retention with Cloud Tier. Natively tier deduplicated data to the cloud without the need for separate cloud gateway or virtual appliance. Instead, data can be sent directly from PowerProtect to the cloud with seamless management through PowerProtect Data Manager, the next generation software platform for proven and modern multicloud environments, where the data movement policy is managed. Additionally, PowerProtect works with many of the the leading backup and recovery platforms to provide comprehensive end-to-end data management and protection for your enterprise. Leveraging Dell Technologies, Wasabi and your preferred backup solution provider gives customers flexibility and peace of mind.

Secure and Transparent Data Backup Management for Complete Peace of Mind

Data security has never been more important to organizations than it is right now. The growth of risk related to data loss from cyber-attacks or other threats is ever increasing. Dell Technologies and Wasabi together can help address this risk with DD encryption to ensure data being sent to the cloud remains secure and Wasabi's encryption for data while at rest or in transit.

Features

- Low cost for high performance cloud storage
- Simple, fast integration, and deployment
- High-speed data transfers, deduplication, and compression to Wasabi cloud object storage
- Data encryption

Benefits

- Fast, secure, efficient data protection
- Increased simplicity with API driven management consoles
- Enhanced operational efficiency with native tiering to the cloud

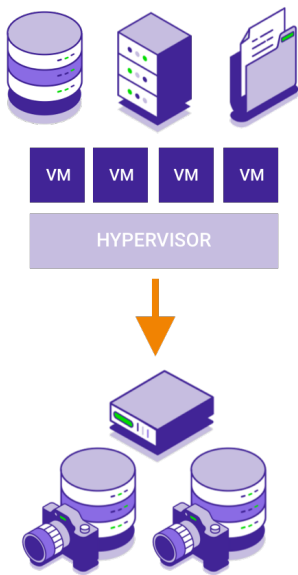

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

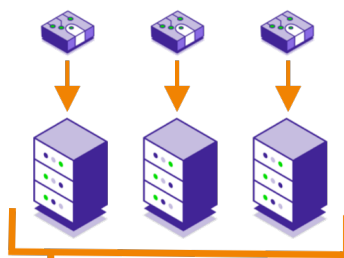

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests.
