

# Fast and Flexible Hybrid Cloud Workload Management with IBM Cloud Satellite and Wasabi Hot Cloud Storage

## What is IBM Cloud Satellite?

In today's ever-changing, distributed hybrid cloud world, it is critical to be able quickly deploy workloads that are close to wherever the data resides. Being able to respond quickly and cost-effectively to these new requirements is a daily reality for organizations in any industry or market segment. IBM Cloud Satellite offers a true multi-cloud solution that allows for managing workloads from a single control plane, regardless of where they are deployed.

By connecting IBM Cloud Satellite with Wasabi Hot Cloud Storage, it is now possible to build solutions that run where needed: locally at customer sites, in on-prem data centers, or in the public cloud – and still have access to all of your data – with the required performance and security, and the peace-of-mind that comes with 11 nines of Wasabi data durability.

## Why IBM and Wasabi Are Better Together?

Together, IBM Cloud Satellite and Wasabi provide the framework and platform for deploying distributed edge-to-cloud solutions with bottomless cloud storage capacity, using the tools and languages your team already knows, and managed through a single control plane.

Couple this fast, flexible hybrid platform workload management with cost-effective and secure cloud object storage to get a complete solution for growing data management requirements.

## Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi Hot Cloud Storage is designed with eleven nines (99.99999999%) of object durability and

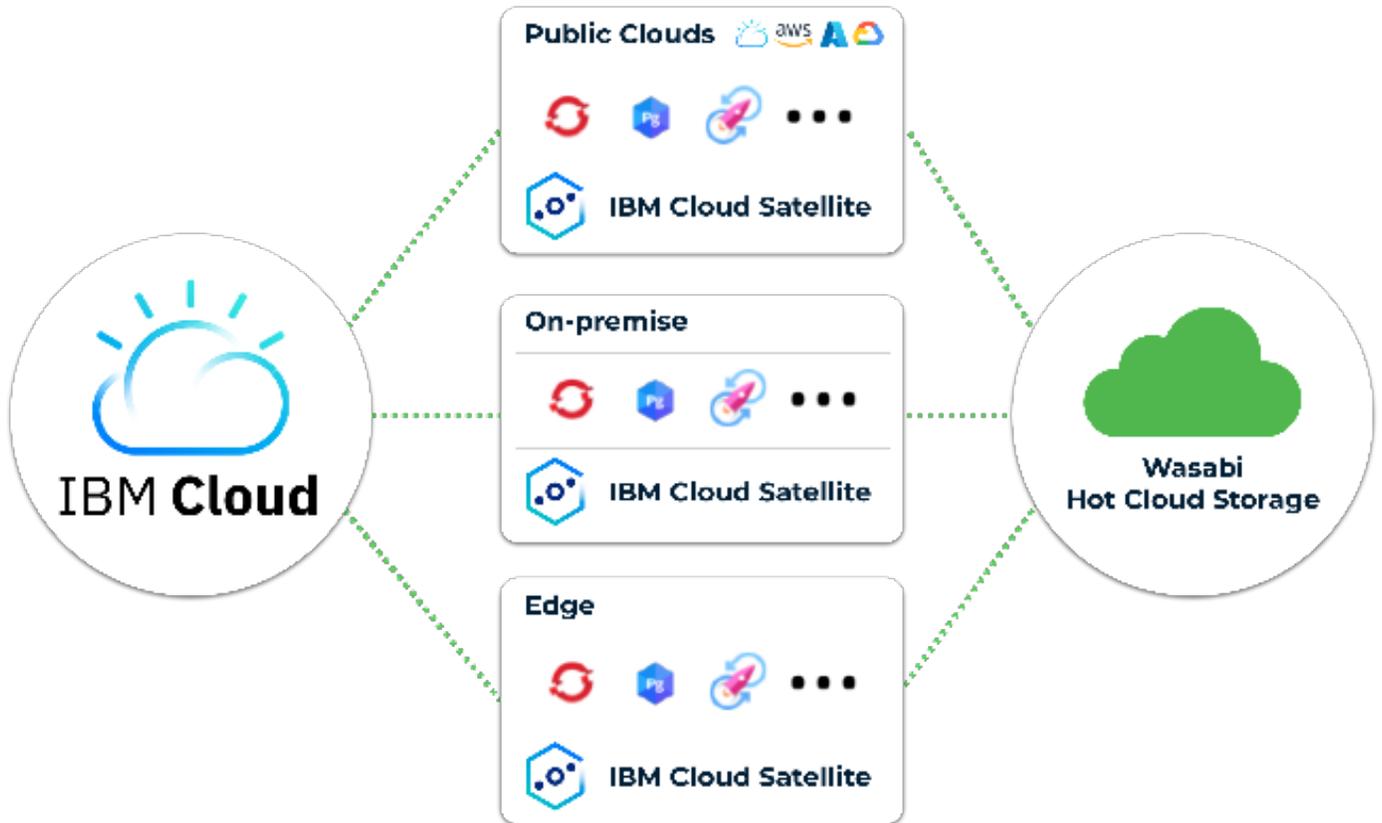

## KEY FEATURES

- Centralized control plane for managing edge, data center and cloud workloads
- Fast and secure connectivity to Wasabi from any location
- Scalable workload deployment to support hybrid infrastructure requirements with cost-effective cloud storage

## BENEFITS

- Multi-cloud compute and storage management at a fraction of the price of hyperscalers
- Comprehensive security and regulatory compliance adherence
- Protection from vendor lock-in and excessive fees across hybrid infrastructure environments

data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data “hot” so it can be accessed in milliseconds. All IBM and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

#### ABOUT WASABI

Wasabi provides simple and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data with no complex tiers or egress or API fees, delivering predictable costs that save money and industry leading security and performance businesses can count on. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology’s fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston. Wasabi is a Proud Partner of the Boston Red Sox, and the Official Cloud Storage Partner of Liverpool Football Club and the Boston Bruins.
