Content Management, Curation, & Orchestration With Quantum CatDV And Wasabi

Any organization managing a large volume of video, images, and other valuable file data needs to catalog and organize these assets – both in-work and after completion. Quantum CatDV is an agile asset management and workflow orchestration platform that provides powerful asset management, automation, and collaboration tools for any organization that manages large volumes of digital media. The platform delivers a wide variety of media-centric capabilities, including traditional PAM, MAM, and DAM, sophisticated workflow automation, and fully customized applications

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All Quantum and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

Do More with Content Archival and Remote Editing in the Cloud

Quantum CatDV's centralized asset management system with Wasabi cloud storage allows organizations to take full stock of their collected content library. The hybrid solution gathers data from local sources as well as archives kept in the cloud, giving managers a more accurate picture of their total asset library. Quantum CatDV also leverages the latest AI to aid in metadata tagging, text-to-speech, and automatic translation services to make content searchable, taggable, and discoverable.

KEY FEATURES

- Remote editing collaboration with Adobe Premiere Pro integration
- AI integration for metadata tagging and transcription capabilities
- Purpose-built for large datasets with unlimited users and roles
- Multi-site capabilities for decentralized and remote workflows

BENEFITS

- Communicate and collaborate more effectively in real time
- Unlock value in large content archives
- Save time and money by leveraging artificial intelligence
- Enable remote workers with centralized access

Quantum CatDV and Wasabi make team-based collaboration faster and more focused with the addition of remote editing on Adobe Premiere Pro and Creative Cloud. Once installed, the Quantum CatDV panel can pull content from the centralized environment, giving creative users access to their entire content and project asset library directly within the Adobe workflow tool of choice.

Complete Quantum StorNext shared storage environment for on-site and remote creators, option of additional worker and transcode servers

Installation, training, tuning for both on-site and remote creators and producers

Cloud proxy workflow configuration for remote producers and creatives

Quantum CatDV panel for Adobe Premiere Pro and other Adobe Creative Cloud Applications

Choice of active archiving solutions: ActiveScale, Scalar Tape, cloud

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
