

Wasabi and CentreStack combine to create a cloud-based file server solution

What is CentreStack File Server?

Is your traditional file server holding you back? CentreStack transforms the familiar drive mapping, file locking, and permission controls from your file server into a versatile cloud solution. Integrated with Active Directory and tailored for your business, we provide seamless remote file access without losing the essence of a file server. No more compatibility issues – step into the future of file management.

CentreStack provides a unique cloud file server solution that integrates Active Directory, NTFS permissions, remote mapped drive and file locking capabilities with Wasabi cloud storage services. The end result is a single solution that inherits both the security features of the existing IT infrastructure and the mobility and durability of the cloud.

Why Wasabi and CentreStack Are Better Together?

Wasabi and CentreStack, with its API integration, adds secure remote access and file sharing, disaster prevention and recovery to on-premises file servers with easy cloud migration to Wasabi Web Services. For files and folders that you have already migrated to Wasabi Storage in other ways, CentreStack puts a file server interface above the raw Wasabi Storage service and turns it into a secure access and file sharing solution.

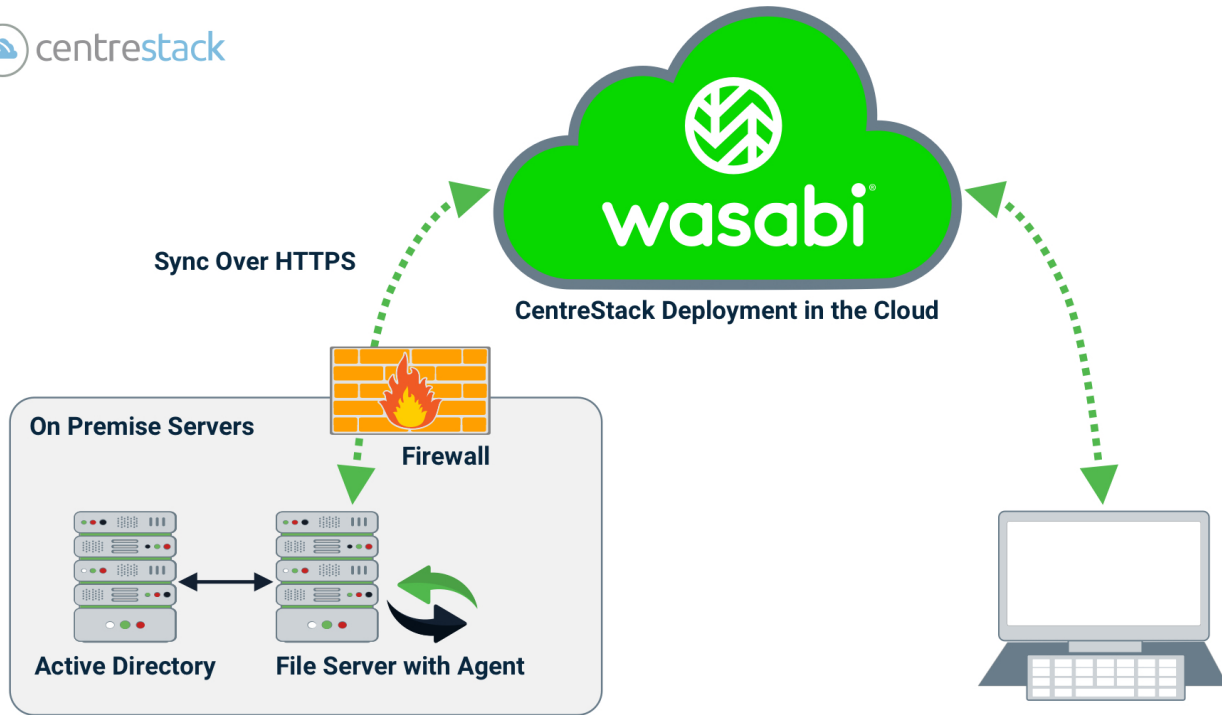

CentreStack provides a mapped drive letter for end users to access Wasabi Hot Storage in an easy and seamless way. It is not only suitable for a single user, but also for a team of collaborators working together on a set of shared folders and files.

KEY FEATURES

- Secure remote access and file sharing
- Secure and durable cloud file server
- Reduce costs for servers & VPN management costs

BENEFITS

- Mobility and modernization without sacrificing compatibility
- Reduced costs and complexity
- Seamless user experience while enhancing security

The Wasabi and CentreStack solution reduces costs for organizations through eliminating the need to replace servers, VPN management costs and cloud storage for up to 80% less than the hyperscalers.

The CentreStack and Wasabi Storage integration provides a powerful solution for organizations seeking a comprehensive cloud file server experience. By embracing file server mobilization and compatibility, businesses can bridge the gap between backup and file server capabilities, revolutionizing collaboration, data control, and accessibility. The combined solution leverages the affordability, scalability, and reliability of Wasabi Storage while harnessing CentreStack's file-server-compatible access and collaboration layer.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
