

# Wasabi Account Control Manager

Automate cloud storage account creation, management and user billing with an easy to use centralized management interface

## Customer Growth and Account Administration Adds Challenges

Managing multiple cloud storage accounts individually can be complex and cumbersome. As the number of accounts grow, organizations would like to set up policies and manage billing across these accounts in a simple, manageable way. To ease the management of multiple accounts, Wasabi developed the Wasabi Account Control API. It provides a more efficient, automated solution for creating new accounts. However, customizing the Wasabi Account Control API for your specific needs can consume technical resources and time.

## The Solution

The **Wasabi Account Control Manager** harnesses the power of the Wasabi Account Control API and presents it as an easy-to-use graphical user interface. This solution can be used to cut your Wasabi implementation time down to minutes instead of days and offers a simple method of setting up your accounts right away. This means that your Wasabi cloud storage users are up and running faster, with less back-end complexity for you.

As your cloud storage accounts grow, the Wasabi Account Control Manager is here to make account management simple. The hosted management interface allows you to centrally manage all of your Wasabi accounts under management (sub-accounts) from a single Control Account.

### Key Benefits

- **Increase Service Velocity**
  - Get accounts up and running faster
  - Speed time to revenue
- **Reduce Administrative Complexity**
  - Centralized view into accounts
  - Automate policy management
- **Simplify Billing and Chargeback**
  - View charges incurred by all accounts
  - Share billing information with account owners in easy to read exports: CSV, XLS, JSON
- **Customized Branding**
  - Login Screen – Logo and site name
  - Logo and custom colors
  - White label URL support

## Automate Wasabi Account Creation and Management

The Wasabi Account Control Manager helps you simplify operations by automating the creation and modification of sub-accounts. With it, you can create trial accounts, assign trial quotas and duration, and convert them to paid accounts when ready. The Wasabi Account Control Manager allows you to create, change, or import sub-accounts into Account Control Manager from the Account Control API.

## Insight Into Storage Accounts

Wasabi Account Control Manager provides information that allows you to:

- Identify active and deleted storage
- Identify API requests
- Know how much data is being egressed
- Know the number of stored objects and deleted objects

## Account Governance

Wasabi Account Control Manager's Account Governance feature gives you access to a tier above Control Accounts. Governance tier users can manage multiple Control Accounts, and have a wider range of roles and permissions than Control Account users to maximize customizability for your WACM use case.

If you are interested in Account Governance, please send an email to [sales@wasabi.com](mailto:sales@wasabi.com).

## White Labeling with Custom Cloud Console

Ideal for MSPs and Resellers Wishing to White Label Wasabi Hot Cloud Storage.

Would you prefer to white-label your Wasabi cloud object storage service? Custom Cloud Console is a unique feature of Wasabi Account Control Manager that enables you to customize the interface with your company's name, logo, and color scheme for a fully branded experience for your end customers.

## WACM Connect

WACM Connect is a set of API endpoints that give WACM users another lens into their Wasabi accounts under management. Using a set of RESTful JSON methods, WACM Connect allows

users to query against Wasabi account information such as bucket, usage and invoice data and return relevant metrics from within the API platform. WACM Connect streamlines the query process, saving time for users with multiple accounts under management by bypassing the WACM GUI and giving WACM users direct access to relevant data.

At a high level, WACM Connect allows customers to:

- Create API Keys from their user profile
- Query utilization of sub-accounts at the account level and bucket level
- Query and filter invoices of sub-accounts
- Provides WACM AG Customers a new way to access data across Control Accounts
- Easily request utilization for RCS Contracts

For more information including a full list of endpoints visit the WACM Connect API guide.

With this information, you can accurately forecast capacity trends which helps you better understand your usage of resources.

The screenshot shows the Wasabi Sub-Accounts dashboard. At the top, there are four summary cards: 244 Paid Accounts, 14 On-Trial, 0.0728 TB Avg Total Storage per Account, and 18.7802 TB Total Storage. Below these is a 'Sub-Accounts' section with a search bar, a filter dropdown, and a date selector set to 10-Sep-2023. A table lists various sub-accounts with columns for Name, Account Email, Active Storage (TB), Deleted Storage (TB), Storage Utilization (with progress bars and percentages), Creation Date, Trial Expiration, Status (all 'Paid Account'), and Record Date.

Name	Account Email	Active Storage (TB)	Deleted Storage (TB)	Storage Utilization	Creation Date	Trial Expiration	Status	Record Date
000Nealesimpkins	nealesimpkins1@gmail.com	0.00190899	0.00000000	0.0019 TB of 20 TB <1%	03-Oct-2022		Paid Account	10-Sep-2023
