

Wasabi Account Control Manager

Simplify and automate the creation, management, and billing of cloud storage accounts

Customer Growth and Account Administration Adds Challenges

Whether you're a service provider or an enterprise, managing a growing environment of cloud storage accounts can be daunting. As the number of storage accounts grows, customer onboarding and service activation takes longer. This lengthens time to market and delays time to revenue. In addition, lack of visibility and insight into your storage environment hurts the customer experience, which can lead to poor customer experience and churn.

The Solution

Wasabi Account Control Manager makes storage account management simple. Managed service providers can grow a profitable cloud storage service and enterprises can efficiently manage cloud storage for departments, teams, and business units within a large organization. The Wasabi Account Control Manager accelerates your Wasabi Hot Cloud Storage deployment, giving you the power to stand up a multi-tiered cloud storage service in less than an hour. This means that your cloud storage users can be up and running faster, with less back-end complexity for you.

With Wasabi Account Control manager you can:

- Easily set up and activate new cloud storage accounts Identify and generate reports for API requests
- Reduce or eliminate manual processes to reduce human error, accelerate service delivery, and onboard customers faster
- More easily manage the billing and invoicing process
- Use the Wasabi Account Control API to integrate with existing IT management frameworks

Key Benefits

- **Increase Service Velocity**
 - » Get accounts up and running faster
 - » Speed time to revenue
- **Reduce Administrative Complexity for multi-tier, multi-tenant deployments**
 - » Centralized view into tiered accounts
 - » Automate policy management
- **Simplify Billing and Chargeback**
 - » View charges incurred by all accounts
 - » Share billing information with account owners in easy to read file formats: CSV, XLS, JSON
- **Customized Branding**
 - » Login Screen – Logo and site name
 - » Logo and custom colors
 - » White label URL support
- **Account & Data Security**
 - » Single Sign-On (SSO)
 - » Multi-Factor Authentication
 - » Object Lock (immutability)

Automate Account Creation and Management

The Wasabi Account Control Manager helps you simplify operations by automating the creation and modification of Channel Accounts and Sub-Accounts. Using the Account Control Manager, you can create trial accounts, assign trial quotas, and duration, and convert them to paid accounts when ready. The Wasabi Account Control Manager allows you to create, change, or import sub-accounts into Account Control Manager from the Account Control API.

Channel Accounts

Channel Accounts are Ideal for distributors, OEMs, MSPs, and resellers selling via multiple channel partners. Channel Accounts simplify the management of a multi-tiered storage environment and make it simple to onboard and manage their channel. All the channel accounts and their sub-accounts roll up to the Control Account. This centralizes visibility and maximizes the volume discount from Wasabi so you can build and grow a profitable cloud storage service.

Channel Accounts are also valuable for managing storage accounts in large organizations. You can delegate operational control as needed by making a business unit or department a Channel Account and letting them create and manage their storage users. Admins can create, manage, delete sub-accounts and access sub-invoices to a channel's Sub-Accounts.

Insight Into Storage Accounts

Wasabi Account Control Manager provides information that allows you to:

- Identify and generate reports for active and deleted storage
- Identify and generate reports for API requests
- Know how much data is being egressed
- Know the number of stored objects and deleted objects

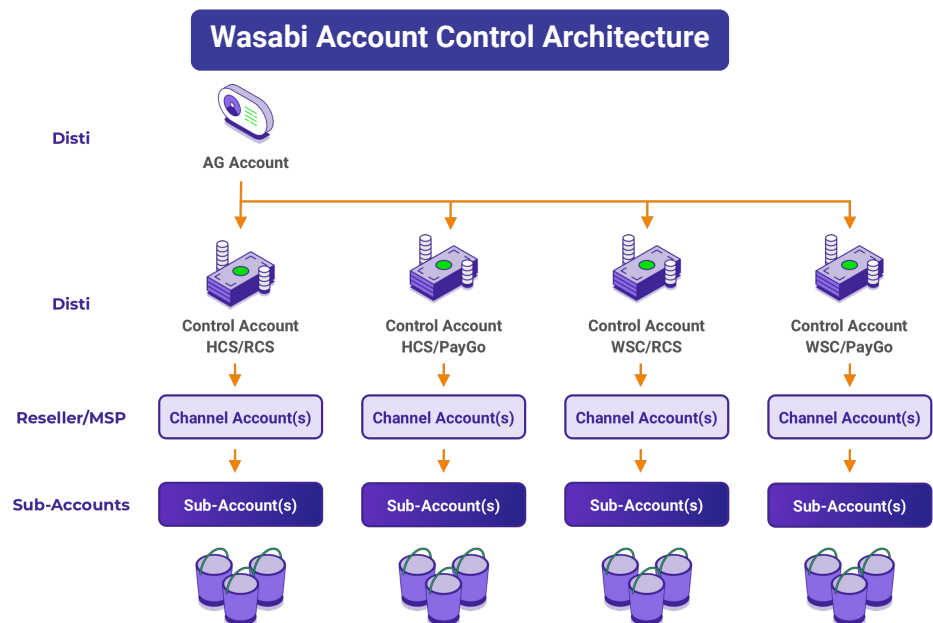

Account Governance

Wasabi Account Control Manager's Account Governance feature gives you access to a tier above Control Accounts. Governance tier users can manage multiple Control Accounts, and have a wider range of roles and permissions than Control Account users to maximize customizability for your WACM use case.

If you are interested in enabling Account Governance, please send an email to sales@wasabi.com.

A Simpler Way to Manage a Multi-Tiered Deployment

- Wasabi Account Control Manager supports a three-tier model for account management
- Control Accounts can provision Channel Accounts as well as Sub-Accounts.
- Channel Accounts are fully enabled, fully managed accounts with rollup billing data for all sub accounts.

White Labeling with Custom Cloud Console

Ideal for MSPs and resellers who want to white label Wasabi Hot Cloud Storage. Custom Cloud Console is a unique feature of Wasabi Account Control Manager that enables you to customize the interface with your company's name, logo, and color scheme for a fully branded experience for your end customers.

Customized and Branded Account Sign-Up

Customized and branded sign-up pages simplify onboarding and account setup for managed services and keep your brand front and center:

- Sub-account & Standalone account creation with a hosted, brandable sign-up page
- Your account database is automatically updated with the signup source
- Billing operations flow through the partner or the end user depending on your account structure

Wasabi Account Control Manager Connect

WACM Connect is a set of API endpoints that give WACM users another lens into their Wasabi accounts under management. Using a set of RESTful JSON methods, WACM Connect allows users to query against Wasabi account information such as bucket, usage and invoice data and return relevant metrics from within the API platform. WACM Connect streamlines the query process, saving time for users with multiple accounts under management by bypassing the WACM GUI and giving WACM users direct access to relevant data.

At a high level, WACM Connect allows customers to:

- Create API Keys from their user profile
- Query utilization of sub-accounts at the account level and bucket level
- Query and filter invoices of sub-accounts
- Provides WACM AG Customers a new way to access data across Control Accounts
- Easily request utilization for RCS Contracts

For more information including a full list of endpoints, visit the [WACM Connect API guide](#).

If you are looking to add a fully branded, multi-tiered storage-as-a-service offering to your portfolio of cloud services, Wasabi is the best place to start. To get started with quickly and easily, [contact us today](#).
