

# Control Storage Expenses with Wasabi and Spectra Logic

## Instantly Scalable Hybrid Storage Aligns Costs with Data Value

Data growth is spiraling out of control, creating operational and financial challenges for many IT organizations. Conventional on-site storage platforms and first-generation cloud storage services are too expensive and complicated to scale and manage.

Wasabi has partnered with [Spectra Logic](#) to help businesses reduce storage cost and complexity. Wasabi hot cloud storage is incredibly affordable and fast cloud object storage for any purpose. And Spectra BlackPearl combines diverse storage targets and technologies into a converged storage system for greater resiliency and efficiency.

The tightly integrated solution lets you blend on-site and cloud-based resources to form an instantly scalable hybrid storage pool for ultimate flexibility, performance and economics.

## Wasabi Hot Cloud Storage Delivers Breakthrough Economics

**Wasabi hot cloud storage** is the industry's most affordable and highest-performing cloud storage service. Wasabi is 80% cheaper and 6x the speed of alternative cloud storage services like Amazon S3.

Specifically conceived to make cloud storage a commonplace utility like electricity, Wasabi hot cloud storage is easy to understand, easy to order and incredibly cost-effective to scale. With Wasabi there are no confusing cloud storage tiers to decipher and no complicated fee structures to decode.

Engineered for extreme data integrity and security, Wasabi provides eleven 9s object durability and supports configurable data immutability to protect against accidental deletions, ransomware and viruses, and to ensure regulatory compliance. A parallelized architecture lets you rapidly move large datasets in and out of the cloud.

## Spectra BlackPearl Converges Diverse Storage Technologies

**Spectra BlackPearl** lets you merge on-site and cloud-based resources to create an agile, hybrid storage pool. The product integrates traditional file-based and tape-based storage with cloud object storage services, helping you reduce expenses and simplify operations, while protecting and extending previous investments.

## KEY FEATURES

- Instantly scalable hybrid storage for any purpose
- Affordable primary storage for infrequently accessed data
- Inexpensive and reliable secondary storage for backup and recovery
- Durable storage for archival and compliance
- Seamless integration and operation

## BENEFITS

- Reduce storage cost and complexity
- Protect and extend previous investments
- Align storage expenses with data value
- Mitigate risk and exposure due to data loss
- Eliminate vendor lock-in and increase choice

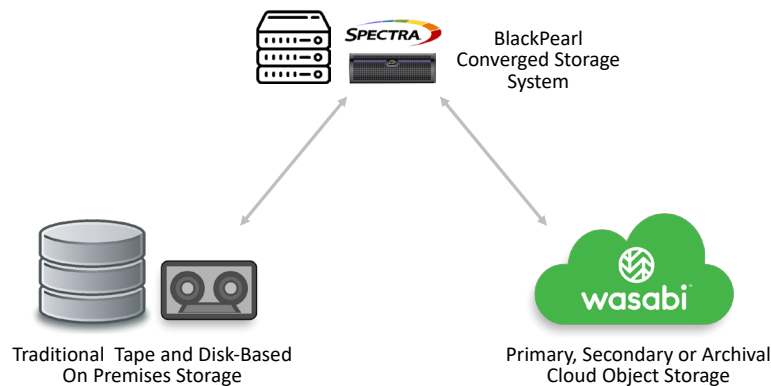

Acting as a centralized object storage gateway, BlackPearl provides a single interface that lets you easily send and retrieve large amounts of data directly from your existing native applications, to and from any storage platform. By creating a diversified storage environment you can improve resiliency and data protection, while optimizing performance and ensuring strong security. And by leveraging different storage resources for different purposes, you can better align storage costs with data value.

## Extensible Solution Supports Multiple Use Cases

The integrated Wasabi-Spectra Logic solution supports a wide range of applications:

- Use local arrays for fast primary storage for on-premises workloads with stringent performance requirements.
- Use Wasabi hot cloud storage for low-cost and fast primary storage for cloud-based workloads or for storing infrequently accessed enterprise application data.
- Use Wasabi hot cloud storage for cost-effective secondary storage for backup, for disaster recovery in the cloud, or for data migration initiatives.
- Use Wasabi hot cloud storage for affordable and reliable archival storage for compliance and long-term data retention.

BlackPearl provides a common policy-based framework for integrating diverse storage technologies and managing data throughout its lifecycle.

## Next Steps

- **CONTACT WASABI TODAY.** Learn more about our price, performance and protection benefits.
- **TRY WASABI FOR FREE.** Get up to 1 TB for 30 days.
- [Learn more](#) about how Spectra BlackPearl can help you converge storage technologies and simplify operations.

### ABOUT WASABI

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage. Wasabi is 80% cheaper and up to 6x faster than Amazon S3, with 100% data immutability protection and no data egress fees. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is on a mission to commoditize the storage industry. Wasabi is a privately held company based in Boston, MA.
