

Video Surveillance Built for Scale and Flexibility

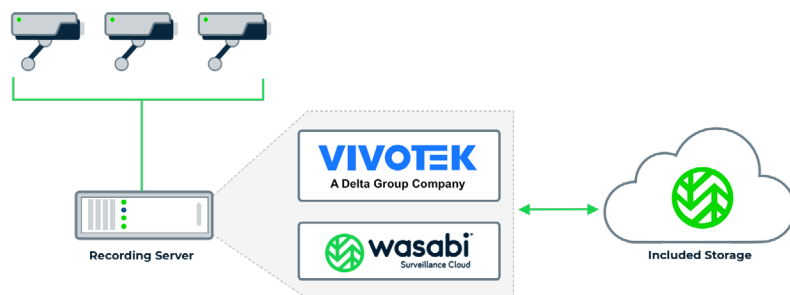

Managing Surveillance Data from Camera Lens to Video Playback

VIVOTEK offers a wide array of technologies focused on leading the global market adoption of innovative solutions for video surveillance and security. Both of VIVOTEK's video management software (VMS) applications, VAST 2 and VAST Security Station (VSS), offer powerful, yet user-friendly platforms easily managing surveillance and security devices from a single pane. The open platform of VIVOTEK's products allows for easy integration with new and existing solutions allowing users to optimize solutions with best-in-breed providers.

Creating Scale with Bottomless Cloud Storage

The VIVOTEK and Wasabi solution offers a complete surveillance system from VIVOTEK's line of network cameras and award-winning management software, to Wasabi's simple and secure hot cloud storage. VAST 2 offers a powerful platform that can easily manage any number of cameras and other security devices with the flexibility to adapt and grow as needs change.

As camera counts and resolutions grow, the amount of data created can be difficult to manage and resource intensive to maintain. Wasabi Surveillance Cloud works with VAST 2 and VSS to easily replicate on-premises recordings for instant disaster recovery or extend capacity limits creating a bottomless storage reservoir. Data is securely stored based on user-defined retention policies helping to meet growing data needs and industry-specific compliance regulations.

Wasabi Surveillance Cloud installs onto any Windows-based server, recorder, or other on-premises hardware in minutes with no system downtime or reboot required. Once configured with VIVOTEK, data begins offloading into Wasabi's cloud safeguarding against loss due to disaster, damage, or accidental deletion.

KEY FEATURES

- Seamless backup of on-prem recordings
- Endless storage extension into Wasabi's cloud
- Instant access to stored data directly within interface
- Industry-leading data security, durability, and compliance standards
- Predictable video management and data storage costs

BENEFITS

- Safeguard recordings against deletion, damage, or loss with instant disaster recovery
- Reduce installation time and costs with intuitive technologies that work together
- Integrate with new and existing systems and technologies on an open platform

Finding the Video Data You Need - When and Where You Need It

Users of the VIVOTEK and Wasabi solution can easily manage live and recorded data directly within the VAST 2 and VSS interface. Data offloaded into Wasabi's cloud is instantly accessible to authorized users from anywhere at any time. The VMS, add-on video analytics, and other software applications interact with video data stored with Wasabi Surveillance Cloud as if stored locally.

VIVOTEK's Smart Search II feature analyzes video data to find and bookmark specific details within recordings and sending notifications based on policy. With VIVOTEK's Evidence Lock and Evident Export, video is automatically bookmarked allowing users to extend the retention time and/or rapidly export multi-channel video recordings.

Protecting Data Above All Else

Storing data is only half the battle – storing it securely is another challenge. Wasabi is deployed in fully secure and redundant data centers certified for SOC-2 and ISO 27001 compliance. The service is architected following industry-best security models and design practices. All communications with Wasabi are transmitted over SSL (HTTPS) to protect data in transit and at rest. Wasabi provides eleven nines (99.999999999%) of object durability, protecting data against disk failures and media errors.

Wasabi's cloud is HIPAA-compliant, CJIS-compliant, FERPA-compliant, GDPR-ready, and MPA-compliant helping to meet industry-specific needs often found in healthcare, education, government, cannabis and beyond.

VIVOTEK was certified by an international standard validation called "ISO 27001 Information Security Management System" of BSI British Standards Institute and has officially gone through the certificate awarding ceremony in September 2022. VIVOTEK has accomplished formulation of ISO 27001 related specifications and is going to implement management and control related mechanisms and operating specifications in an active manner in the upcoming years.

About VIVOTEK

As one of the world's most trusted IP surveillance solutions provider, VIVOTEK delivers intelligent security, control, and management for a safer society. With more than 20 years at the forefront of the industry, we've driven breakthroughs in R&D and built a solid technological foundation for the industry. Via a global network of countries, we serve system integrators building intelligent solutions for end-users around the world. In 2017, we joined the Delta Group, a global leader in power and thermal management solutions, to serve as the security and intelligence core of Delta Building Automation Business.
