

Wasabi Hot Cloud Storage

Wasabi Hot Cloud Storage is a universal, one-size-fits-all cloud object storage service that simplifies storage by enabling a highly available environment across a range of business use cases. With Wasabi, all data is treated equally—without confusing storage tiers—giving you the freedom to access your data anytime, no matter how you classify it: hot, cool, or cold. Our hot cloud storage is low-cost, secure, and durable, with no tier-based latency delays.

Wasabi Hot Cloud Storage provides the following key features:

- › S3 compatible/compliant API for seamless application integration
- › Purpose-built platform and API for managing and monitoring multiple Wasabi accounts
- › Graphical user interface management console for easy bucket management
- › Security features including object lock (immutability), MFA, multi-user authentication, and IAM (RBAC)
- › Predictable pricing with Reserved Capacity or Pay-As-You-Go options
- › Perfect for SMBs and Enterprises with constantly growing datasets

Wasabi AiR Intelligent Media Storage

Breathe new life into your media. Wasabi AiR is intelligent cloud object storage designed to help you quickly find and affordably access any moment in every media file you own. Wasabi integrates capacity-based storage with AI-based metadata auto-tagging, multilingual transcription, and an intuitive search console.

Wasabi Surveillance Cloud

Wasabi Surveillance Cloud is a bundled offering that integrates a cloud bridge software application with a Wasabi Hot Cloud Storage subscription. Users of every major video management system (VMS) now have the ability to offload video surveillance data from their local storage environment to the cloud without making any changes to their existing operations.

Wasabi Cloud NAS

Extend the life of your on-premises servers, reduce costs, and never run out of capacity with fast and secure cloud network attached storage. Connect it to your existing on-premises NAS, SAN or DAS to automatically offload cold data (or any data) to low-cost Wasabi hot cloud storage. Use it to free up server capacity while keeping your data available and retrievable within milliseconds.

Wasabi Cloud Sync Manager

Wasabi Cloud Sync Manager provides a seamless migration for safe, secure transition of your data into a more predictable cloud infrastructure. Experience a risk-free transfer when migrating data into Wasabi from other leading object storage hyperscalers like AWS, Azure, GCP or any other S3-compatible platforms, at a fraction of the cost of the leading migration partners.

Wasabi Ball Transfer Appliance

The Wasabi Ball Transfer Appliance lets you move large datasets to Wasabi Hot Cloud Storage quickly, conveniently, and cost-effectively. A Wasabi Ball can store up to 250 TB at a time and is ideal for customers who don't have sufficient network connection speeds to transfer large amounts of storage over the Internet or private network connections.

Wasabi Direct Connect

Wasabi Direct Connect is a high-speed, private, secure connection from your on-premises data center or colocation site directly to Wasabi. With this solution you can reduce network costs, increase bandwidth, and provide a dependable network experience for your organization, using connection options of N x 1, 10 or 100 Gbps speeds.

Wasabi Account Control Manager

The Wasabi Account Control Manager is an all-in-one hosted platform that enables you to easily provision, monitor and manage the Wasabi storage service in a multi-tiered environment. Wasabi Account Control Manager harnesses the power of the Wasabi Account Control API delivered within an easy-to-use graphical user interface. MSPs and large multi-divisional organizations can cut their storage implementation time to minutes instead of days, getting users up and running faster.

Using the Account Governance feature also allows you to manage an additional tier of accounts. The Custom Cloud Console feature supports custom branding for OEMs and MSPs to present Wasabi as a white-labeled service.

Wasabi Explorer

Wasabi Explorer is a free app that helps you to transfer files between your Windows or Mac system and your Wasabi account. With Wasabi Explorer you can upload files, download files, create folders, and manage the files in your Wasabi buckets.

Technology Alliance Partners

Wasabi works in conjunction with a plethora of partners to simplify the integration of our cloud storage service with their applications. Together we provide solutions to store your data securely, and economically, with the performance expected by enterprises of all sizes in every possible industry. Major application vendors supported include: Veeam, Commvault, Acronis, Axis, Hanwha, Milestone, Adobe, LucidLink, and others.
