Comprehensive Immutability for Hybrid Infrastructure with Wasabi Hot Cloud Storage and Object First Storage Appliance

What is Object First Storage Appliance?

Traditional backup storage comes with compromise, forcing you to sacrifice performance for affordability, simplicity for performance, or resilience for simplicity. Object First eliminates the need for Veeam Backup and Replication (VBR) v12 customers to compromise or sacrifice.
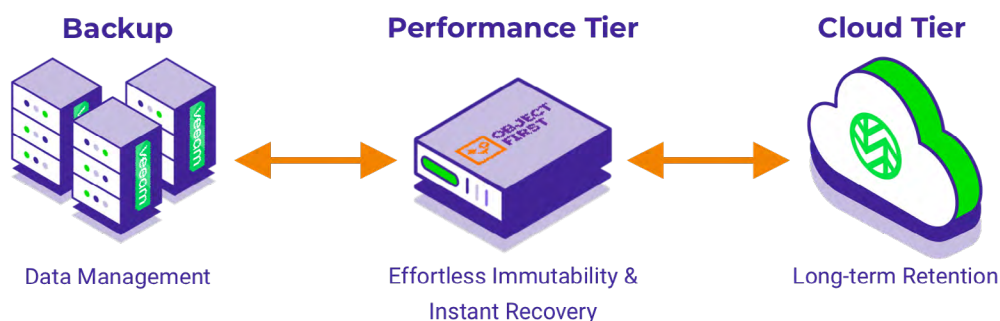

Object First's "OOTBI" stands for out-of-the-box immutability and delivers simple, powerful, and affordable backup storage for Veeam customers. The solution can be racked, stacked, and powered in 15-minutes. Ootbi is built on immutable object storage technology that is designed and optimized for unbeatable backup and recovery performance. Eliminate the need to sacrifice performance and simplicity to meet budget constraints with Object First Ootbi.

Object First keeps your exponentially growing unstructured data in object storage both on premises and in the cloud.

Why Wasabi Makes it Better

Working together, Wasabi and Object First fulfill Veeam's 3-2-1-1-0 backup guidance with fast on-premises object storage and economical cloud object storage. Ensure you can recover your data when you need it most. Seamless integration of the joint solution of Veeam Backup & Replication v12 with both Object First and Wasabi automates the entire backup process and powers Veeam Instant VM Recovery as well as moving your backups to the cloud with Wasabi.

Today the need for risk-mitigation is more prevalent than ever with the constant threats of ransomware attacks. With Object First, powered by S3 object lock, Ootbi storage buckets are immutable by default and synchronize perfectly with Veeam v12 direct-to-object storage configuration powered by the Smart Object Storage API. It also provides a hardened operating system with no root or backend access by design and no required configuration make it easier than ever to protect your data.

Features

› Fast and Simple Deployment in: 15 minutes

› High Performance with speeds of 4.0 gigabytes per second

› Cost-effective for unrivaled price to performance ratio for on-prem and cloud object storage

Benefits

› Ensure the fulfilment of 3-2- 1-1-0 backups with fast onpremises object and hot cloud storage

› Protect data within each component of the backup with full-stack immutability

› Fast on-site and in the cloud backups and backup copies

Long-term Retention

Combining Object First Ootbi with Wasabi's object lock technology, offers a secure hybrid backup solution – one that provides the performance, security and economics necessary to combat the constant threat of ransomware. With Object Lock, your data is immutable at every step of the backup and recovery process, from on-prem as well as backups directly stored in the cloud, ensuring highly secure backup data with instant availability.

The joint solution delivers affordable on-premise object storage with a reliable and affordable cloud tier. Object First complements Wasabi Hot Cloud Storage's price policy with a solution that's affordable to jumpstart with and scale, on top of it taking up a modest hardware footprint. Both Object First and Wasabi believe in predictable , subscription models with no hidden fees, meaning you'll know what your bill is every single month.

About Wasabi

Wasabi is a public cloud object storage service that is 1/5th the price of AWS S3 and faster than the competition with no fees for egress or API requests. Wasabi provides 11 x 9s of data durability, high system availability, and support for immutable storage buckets. Wasabi is fully compatible with the AWS S3 API with support for hundreds of S3-compatible storage applications, including Object First, and has been certified for compliance with enterprise security and privacy standards.
