# Cyber resiliency redefined through a unified, scalable and cost-effective data protection solution with Wasabi and Arctera

A fast, cost-effective, unified backup and recovery solution with Immutable Cloud Storage

Arctera Backup Exec™ makes data protection effortless, secure, and unified. You have full control—decide what to back up, where to store it, and how to manage costs. Your data stays safe and accessible at every step, whether backing up on-premises or the Wasabi cloud, safeguarding cloud-based workloads, or recovering from the cloud. Paired with Wasabi's hot cloud storage, it delivers a seamless, secure, and budget-friendly data protection solution.

Wasabi and Arctera deliver a robust, secure data protection solution for any backup scenario. Together, they help you achieve the 3-2-1-1-0 rule for cyber resilience while staying cost-effective. This scalable, durable, and enterprise-grade solution ensures your organization's data remains protected, no matter where it's stored.

Features

› Secure, and cost-effective cyber-resilient data protection solution

› Streamline backups with direct-to-cloud primary and secondary copies.

› Leverage affordable cloud object storage with unified, scalable backup and recovery solutions

Benefits

› Ensure comprehensive data protection with advanced end-to-end cybersecurity.

› Reduce IT operational costs while scaling seamlessly with flexible capacity models and fewer fees.

› Protect and store all your data without the need for additional licenses or products.

Secure & cyber resilient data protection solution from start to finish

With Arctera Backup Exec and Wasabi's Secure Cloud Object Storage with Object Lock, you have a cyber-resilient data protection solution from end to end. With Wasabi's Object Lock functionality, your data is protected from cyber-attacks through an air-gapped immutable copy for guaranteed integrity when it comes time to recover that data. Additional security features from Wasabi include Multi-Factor Authentication and Multi-user Authentication ensure that no cyber criminals can access your stored data or delete your account. Combined with Arctera's Ransomware Resilience feature that protects backups from being modified, and your data is truly secure from end to end.

Cost-effective and scalable to fit all your data protection needs

With Wasabi's straightforward pricing—no egress or API call fees—paired with Arctera's subscription licensing, you pay only for what you need, maximizing your budget for growing data demands. Test your backups as often as you need to ensure they can always be quickly recovered without fear of additional charges for egress fees or API calls.

Wasabi and Arctera integrate seamlessly to allow direct-to-object backup for affordable cloud-based data protection. Using the direct-to-cloud feature set allows customers to utilize cloud storage as a centralized repository attached to the enterprise's distributed infrastructure. This approach helps streamline backups and enhance data protection while minimizing potential vulnerabilities.

Wasabi and Arctera for a fully integrated data protection solution for all your data

Wasabi and Arctera provide a unified solution for backing up your data from a virtual, physical or hybrid environment to the cloud and eliminates the cost and complexity of deploying multiple products to backup and store your data. Choose Wasabi as your backup target directly within Arctera Backup Exec for a simple, scalable cloud storage solution. Backing up your Microsoft 365 workloads is essential, and unlike many other backup vendors, Arctera Backup Exec allows you to include these workloads in one simple product.
