

CloudSoda Intelligent Data Management and Cloud Cost Analytics for Wasabi

Overview

CloudSoda's data management software is storage-agnostic and ecosystem-aware, providing companies with unprecedented visibility and clarity into their unstructured data. CloudSoda supports all file protocols including SMB/NFS/DAS/SAN storage, and leverages agents across Windows, Linux, and Mac to access data storage. CloudSoda uses predictive analytics and user defined policies that intelligently, quickly, and securely move data across storage tiers to Wasabi.

Whether doing a one-time migration or policy-based data movement, CloudSoda first gives you insight into how much you are spending on your existing storage, any egress for movement, and the cost to store the data in Wasabi. CloudSoda can also be leveraged for identifying hot and cold data, and can be used to archive selected data sets. CloudSoda's simple pricing, along with its unmatched ease of use, take the cost, complexity, and surprises out of managing data at any scale.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All CloudSoda and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

Wasabi + CloudSoda for Refreshing Data Management

CloudSoda's powerful data management capabilities allow users unprecedented insight not only into their storage usage but storage costs as well. This level analysis is crucial for enterprise data managers looking to maximize their hardware as well as their budgets. The CloudSoda platform, combined with Wasabi hot cloud storage illustrates the benefits of low-cost storage in the cloud and the advantages of Wasabi's no-cost egress policy. The simplicity of both the CloudSoda platform and Wasabi make optimizing large datasets intuitive, with predictable pricing on both sides of the solution.

Features

- Policy-based file movement with built in acceleration
- Anywhere-to-anywhere data mobility
- Storage cost analytics
- Easy to use next gen data movement platform

Benefits

- Track and save money by leveraging Wasabi's low cost storage
- No surprise cloud Bills with predictable pricing
- Simplify cloud data management
- Avoid on prem capacity expansions
