

Seamless Data Storage & Orchestration with Wasabi and Hammerspace

What is Hammerspace?

The world is storing more capacity in the public cloud than ever, and enterprises are adopting multiple cloud storage providers to maximize both performance and cost efficiencies.

Whether an organization is outgrowing a single NAS and needs more storage, or wants to implement a tiering strategy to offload expensive storage, inevitably these tasks require files to be migrated away from where they live today, and where users and applications expect to find them.

Hammerspace overcomes the limitations of fragmented on-prem and cloud data environments. The Hammerspace solution is a software-defined automated data orchestration system with a complete set of data services to unify and manage data in a Global Data Environment across the edge, data centers and public cloud infrastructure. Hammerspace delivers the world's first and only solution to connect global users with their data and applications on any vendor's data center storage or public cloud services.

Data migration with Hammerspace is completely non-disruptive and transparent to applications and end-users. Moving data into the cloud with Hammerspace is distinctly different from disruptive legacy data migration solutions that often lead to additional silos and lost productivity.

Why Hammerspace and Wasabi Are Better Together

Hammerspace and Wasabi solve for explosive data growth by extending on-prem resources to cloud seamlessly. You can easily migrate data to the cloud for cost-savings, place data in on-prem high performance storage to accommodate workflows, or build an active archive for tiering and data protection.

All of this happens in the background and can even be automated. Users and applications still see their data as before in the same folders, they don't need to go to a different mount point.

This joint solution provides secure, low-cost data storage and orchestration. It provides seamless online file access to all data, no matter where it resides,

KEY FEATURES

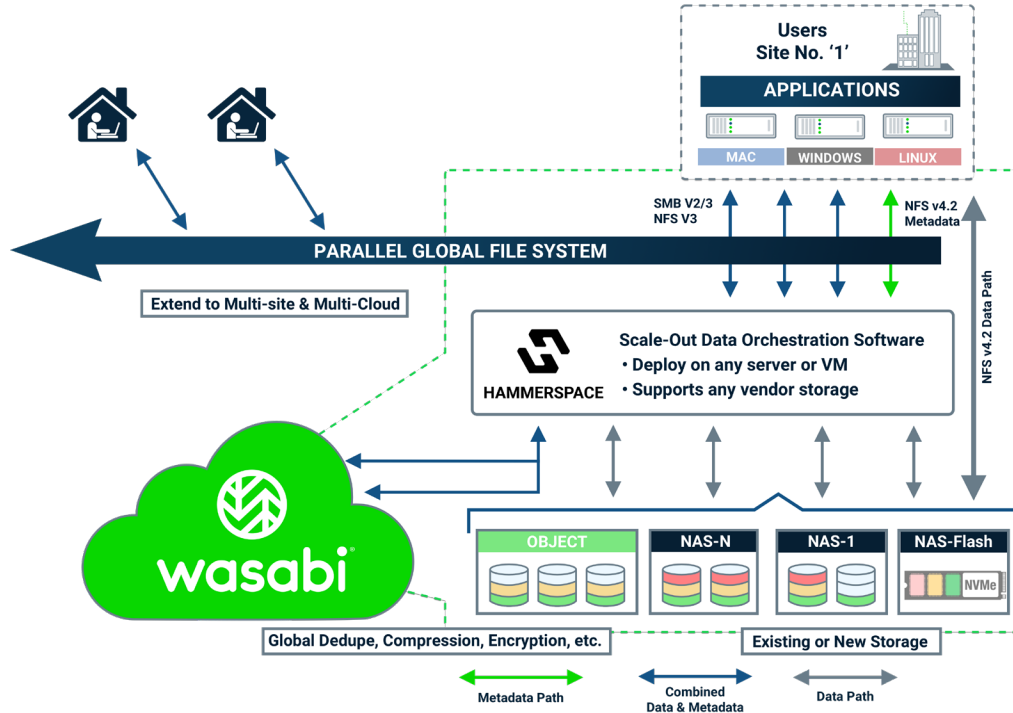

- Ultra-low-cost cloud storage for any purpose
- Easy-to-use file management and data protection tools
- Seamless integration and operation
- Fast and reliable cloud backup and recovery for diverse operating systems, hypervisors and hardware platforms

BENEFITS

- Slash storage and data protection cost and complexity
- Simplify setup and administration
- Accelerate backup and recovery cycles
- Reduce risk and exposure due to data loss
- Protect against equipment failures, disasters, human error, ransomware and malware

where users see their files in the same file structure as on their desktop. Data can be moved without incurring ingress or egress fees and user access is uninterrupted.

Organizations now have the ability to gain insights into their data with Hammerspace and realize immediate savings by moving data to Wasabi. Whether leveraging the cloud for data accessibility, unlimited storage, or for creating a backup or DR strategy, you can expect predictable pricing and unlimited data accessibility.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi’s solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data “hot” so it can be accessed in milliseconds. All Hammerspace and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

ABOUT WASABI

Wasabi provides simple and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data with no complex tiers or egress or API fees, delivering predictable costs that save money and industry leading security and performance businesses can count on. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology’s fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston. Wasabi is a Proud Partner of the Boston Red Sox, and the Official Cloud Storage Partner of Liverpool Football Club and the Boston Bruins.
