

Securely Transfer and Migrate Data with Wasabi and Kiteworks

Kiteworks Managed File Transfer (MFT) Server is part of the Kiteworks Private Content Network, a platform that encrypts, tracks, and controls the sharing of sensitive information across multiple channels, including email, file transfers, web forms, APIs, and enterprise digital rights management (eDRM).

The MFT Server allows businesses to automate, manage, and secure file transfers at scale, ensuring compliance with industry regulations such as Health Insurance Portability and Accountability Act (HIPAA), General Data Protection Regulation (GDPR), and Federal Risk and Authorization Management Program (FedRAMP).

Why Kiteworks and Wasabi are better together

Kiteworks simplifies and secures the movement of data in and out of Wasabi while ensuring all data is encrypted, controlled, and tracked in real time. With Kiteworks, users can automate and control data transfers to and from Wasabi on an ad hoc basis, set up data syncs, or fully migrate data from one storage platform to Wasabi's cost-effective cloud storage.

Designed to protect sensitive content while ensuring compliance, Kiteworks MFT Server provides a validated, seamless integration with Wasabi Hot Cloud Storage.

Kiteworks and Wasabi for MSPs

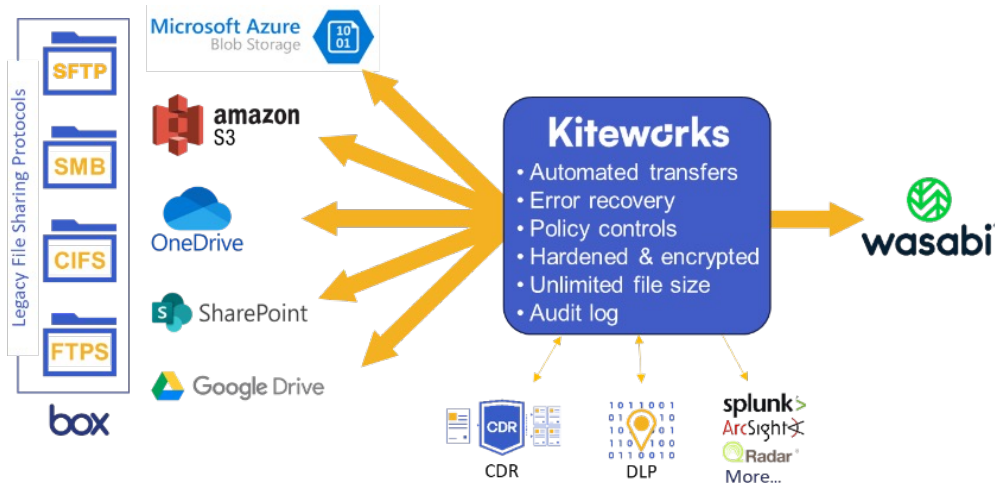

Managed Service Providers (MSPs) leveraging Wasabi can enhance their offerings by integrating Kiteworks for secure file exchange, governance, and compliance. This combination allows MSPs to provide customers with cost-effective cloud storage while ensuring secure collaboration and regulatory adherence. The approach strengthens customer retention, increases revenue, and differentiates MSPs in a competitive market.

Kiteworks

Features

- **Secure & Compliant Transfers** — All data moving to and from Wasabi is encrypted and monitored to meet regulatory standards.
- **Flexible Connectivity** — Beyond Wasabi, Kiteworks MFT Server supports multiple storage and transfer connections.
- **Automated Workflows** — Set up rules to migrate or sync data to Wasabi storage.
- **Migrate Data Securely** — Use Kiteworks to securely move data from more expensive storage options and save money in Wasabi.
- **Complete Visibility & Control** — Logs, audit trails, and real-time tracking provide insight into all data movements.
- **Scalability & Performance** — Optimized for large-scale data transfers without sacrificing security.

Benefits

- › Optimized Cloud Spend with Security
- › Stronger Data Security and Compliance
- › Seamless Migration and Integration
- › Reduced IT and Security Burden
