Wasabi Account Control Manager

Automate cloud storage account creation, management and user billing with an easy to use centralized management interface

Customer Growth and Account Administration Adds Challenges

Managing multiple cloud storage accounts individually can be complex and cumbersome. As the number of accounts grow, organizations would like to set up policies and manage billing across these accounts in a simple, manageable way. To ease the management of multiple accounts, Wasabi developed the Wasabi Account Control API. It provides a more efficient, automated solution for creating new accounts. However, customizing the Wasabi Account Control API for your specific needs can consume technical resources and time.

The Solution

The Wasabi Account Control Manager harnesses the power of the Wasabi Account Control API and presents it as an easy-to-use graphical user interface. This solution can be used to cut your Wasabi implementation time down to minutes instead of days and offers a simple method of setting up your accounts right away. This means that your Wasabi cloud storage users are up and running faster, with less back-end complexity for you.

As your cloud storage accounts grow, the Wasabi Account Control Manager is here to make account management simple. The hosted management interface allows you to centrally manage all of your Wasabi accounts under management (sub-accounts) from a single Control Account.

Automate Wasabi Account Creation and Management

The Wasabi Account Control Manager helps you simplify operations by automating the creation and modification of sub-accounts. With it, you can create trial accounts, assign trial quotas and duration, and convert them to paid accounts when ready. The Wasabi Account Control Manager allows you to create, change, or import sub-accounts into Account Control Manager from the Account Control API.
Account Governance

Wasabi Account Control Manager’s Account Governance feature gives you access to a tier above Control Accounts. Governance tier users can manage multiple Control Accounts, and have a wider range of roles and permissions than Control Account users to maximize customizability for your WACM use case.

If you are interested in Account Governance, please send an email to sales@wasabi.com.

Insight into Storage Accounts

Wasabi Account Control Manager provides information that allows you to:

- Identify active and deleted storage
- Identify API requests
- Know how much data is being egressed
- Know the number of stored objects and deleted objects

With this information, you can accurately forecast capacity trends which helps you better understand your usage of resources.
