

Aria SMARTBOX™ enables real-time system monitoring, providing you with insight to optimize your system's performance anytime, anywhere, on any device.

aria SMARTBOX™

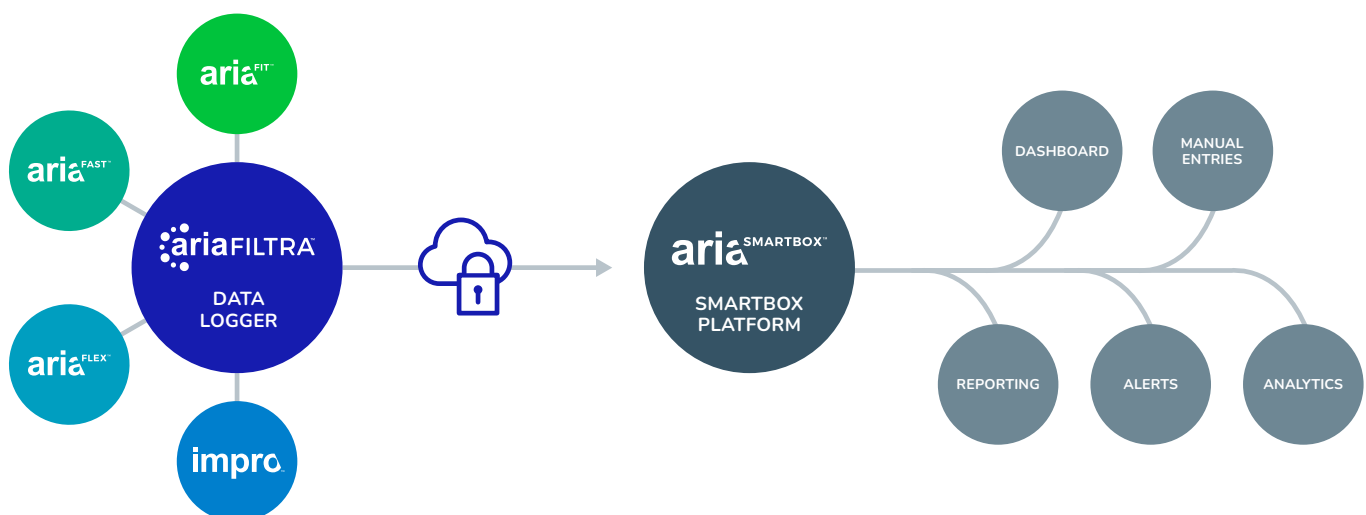

To optimize your water filtration system, you need insight into how it is operating today and how it will perform in the future. **Aria SMARTBOX instantly provides easy-to-use monitoring that offers quick, reliable access to the system performance data you need.**

To help you manage your system effectively, Aria SMARTBOX gives your operators a powerful set of tools, including intuitive dashboards, customizable historic trends, automatic reports, and real-time alerts. The solution is secure, user-friendly, and fully customizable, enabling you to tailor the information you see and how you see it.

Aria SMARTBOX saves you time and money by providing the information you need to optimize system performance on a day-to-day basis. Additionally, it gives you the ability to proactively identify and resolve any potential performance issues to prevent downtime and maintain water quality.

Your plant at your fingertips

- Secure and private remote monitoring
- Fast, intuitive user experience
- Real-time alerts and immediate system status
- Performance insight to help prevent system downtime
- Historic system trends and automatic reports
- Simple and fast ordering of parts and service for optimal system performance

Dashboards

The dashboard includes numerous windows that can be customized to display the information you care about most. Windows are editable and provide instant, at-a-glance interpretation of operating data.

Meters

Meters provide the complete list of process parameters with their current, minimum, maximum, and average values.

Trend lines

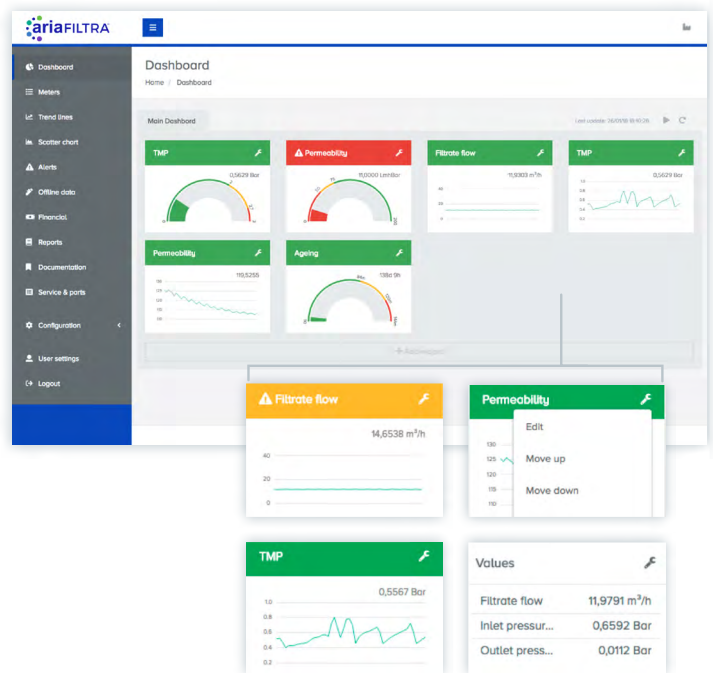

Trend lines enable operators to interactively browse the data, configuring graphs of any meters by data, median, or trend.

Integrated service and support

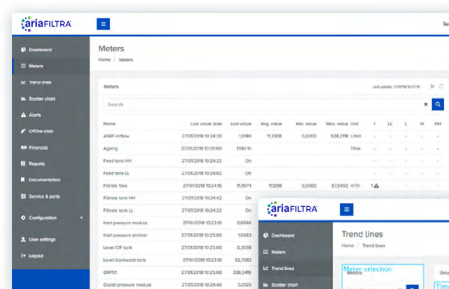

Aria SMARTBOX is just one element of the integrated service package from Aria Filtra™. Additionally, our service team provides:

- System health checks
- Process optimization
- Operator training
- Membrane module replacements
- Spare parts and supplies
