

# Packaged Water Treatment Solutions

aria<sup>FIT™</sup>

## Pre-engineered, packaged solutions

For more than 30 years, Aria Filtra® has provided municipalities and industries with reliable water treatment solutions to meet their most complex water challenges. For your specific needs, Aria Filtra has developed a family of membrane-based, packaged solutions to provide the water you need.

Our Aria FIT™ systems are pre-engineered and factory tested. The modular design can be configured to fit your footprint, budget, and overall project schedule.

### QUICK FACTS

- Processing more than 1,500 million gallons per day (mgd) / 7 million cubic meters per day (m<sup>3</sup>/day)
- More than 1,200 systems sold
- More than 70,000 modules installed
- More than 3,800 years of combined systems operation

## Modular design

Our modular, packaged systems are configurable to meet your needs today and easily expandable to meet your needs of tomorrow. Various possible configurations allow you to optimize not only your available space, but also your performance, at low total cost of ownership.

## Smart solution

Thanks to intelligent diagnostics and automated controls, you can monitor system performance and proactively identify potential issues. In addition, a simplified and intuitive process design ensures easy system operation, optimization, and minimal maintenance.

## Reliable performance

Aria FIT systems are designed to handle variations of incoming water conditions while maintaining productivity and high filtrate quality under all circumstances. They incorporate proven hollow-fiber, thermally induced phase separated (TIPS) membranes known for long life and ease of use. With a proven track record in thousands of systems sold, our membrane technology is the core element that ensures a long lifecycle and high, reliable system performance.

Whether you need a system for the treatment of safe drinking water or water for your industrial processes, Aria Filtra can provide a wide range of membrane-based, pre-engineered, packaged solutions from 5 gallons per minute (gpm) up to more than 2 mgd (1 to 360 m<sup>3</sup>/h) or more.

Our Aria CARE™ service team is available to support you through the whole system lifecycle—during installation, commissioning, and for special requests at any time.

**aria**<sup>FIT™</sup>

Across the globe, Aria Filtra has a proven track record in multiple industrial and municipal water treatment applications including, but not limited to:

### Industrial

- Water reuse and recycling
- RO and ion exchange pretreatment
- Boiler feedwater
- Cooling tower feedwater
- Mining and process water

### Municipal

- Drinking water
- Groundwater
- Water reuse and recycling
- Wastewater treatment
- Boiler feedwater
