

## CASE STUDY:

Kreftforeningen - The Norwegian Cancer Society

**NEW AUTOMATED INVOICE SOLUTION**

**GIVES CANCER SOCIETY MORE TIME**

**FOR ITS CRITICAL WORK**

The Norwegian Cancer Society wanted a smooth transition from

their existing AP automation tool which required a lot of maintenance, to a new, improved maintenance-free solution. With a new solution and effective invoice management in place, the Cancer Society can regain its focus on its main task: fighting cancer.

The Norwegian Cancer Society handles around 8,400 invoices a year. Because their important work is their highest priority, they do not want to spend much time or resource on invoice management. The older billing solution required a lot of maintenance because it was based on older technology so they decided to move to Basware Purchase to Pay, a robust SaaS (Software as a Service) solution based on new technology. With Basware, the Norwegian Cancer Society gets an automated solution for inbound invoices. Invoices with the correct

**"WE IN THE NORWEGIAN CANCER SOCIETY ALWAYS FOCUS ON THE BEST POSSIBLE USE OF OUR MONEY IN VIEW OF OUR DONORS AND PURPOSE. IN THAT WAY, WE MUST BE THE BEST AND MOST EFFECTIVE IN ALL AREAS. FOR US IT WAS IMPORTANT TO GET A NEW SYSTEM THAT WORKED AS CLOSELY AS POSSIBLE TO HOW WE USED TO WORK, PREVIOUSLY, WITH THE LATEST FUNCTIONALITY AND SOLUTIONS. THEREFORE, WE CHOSE TO SWITCH TO TODAY'S SOLUTION FROM BASWARE."**

reference are automatically sent to the approver, but if something is missing from the invoice or not recognised, it is stopped and sent for checking before it is forwarded.

### BETTER FUNCTIONALITY

The older accounts payable solution that the Norwegian Cancer Society had

was built on older technology that is now heavy and costly to maintain. The solution consisted of several modules each requiring their own login. Today, every user has one single login that provides access to all the relevant functionality, according to their user rights and requirements.

Previously, the Norwegian Cancer Society had to manually write down changes to users in one Excel sheet and submit these changes to Basware for processing. Now changes can easily be made in the Basware Purchase to

Pay administrator module. If small setup configurations are required, they can be easily and quickly arranged, without involving additional support.. The user interface itself has been improved, as has the search feature of the new solution, and it helps administrators, super users and common users to handle the solution intuitively, thus saving time throughout invoice process.

### GOOD COMMUNICATION WAS THE KEY

Basware solved obstacles when they arose through the implementation process. Testing and feedback were given during the process and the interaction worked well. "We had a description of what we saw for us with specific requirements. There was a good dialogue with the consultants at Basware, and they had completed all the requirements we had for a new solution. Where there have been any questions along the way, we have only been a short phone call

apart", says Acosta Bello. "We are very pleased to have started with Basware Purchase to Pay, and we now have an effective and future-oriented solution for our handling of invoices," concludes Acosta Bello.

German Acosta Bello is a specialist consultant in the Norwegian Cancer Society.

### ABOUT BASWARE

Basware is the global leader in providing purchase-to-pay and e-invoicing solutions in the world of commerce. We empower companies to unlock value across their financial operations by simplifying and streamlining key financial processes. Our Basware Commerce Network enables easy collaboration between buyers and suppliers of all sizes. With Basware, businesses can introduce completely new ways of buying and selling to achieve significant cost savings and boost their cash flow.
