

# SureDfend™ T

ASPHALTENE INHIBITOR

## OVERVIEW

SureDfend™ T is the industry's first asphaltene inhibitor which helps control deposits that could eventually stop oil flow. It can be placed by continuous injection into the production stream.

When used in conjunction with certain paraffin inhibitors, the combined treatment provides inhibition of crude oils with the tendency to form paraffin and asphaltene deposits.

### APPLICATIONS

- Inhibits asphaltene deposition and accumulation
- Can be used for pipelines susceptible to asphaltene deposition

### FEATURES

- Compatible with certain paraffin inhibitors
- Can be continuously dosed
- High flash point product

### BENEFITS

- When run with a paraffin inhibitor it can help control both asphaltene and paraffin
- Improves oil production and flow that has been restricted due to tar accumulation
- Cost effective prevention treatment to avoid expensive remediation options
- Easy to store and transport
