

SureDscale™ G

CALCIUM SULPHATE SCALE DISSOLVER

OVERVIEW

SureDscale™ G is a fast-acting treatment for the removal of anhydrite, gypsum and other forms of calcium sulfate (CaSO_4) from pipelines, processing and storage facilities. The scale dissolver is a liquid that facilitates the rapid dissolution and removal of CaSO_4 scale or deposits with a single fluid, eliminating long soak times required by other treatments.

SureDscale G begins working on contact with CaSO_4 scale. The total dissolution time of gypsum and anhydrite scales can be achieved in 12 to 24 hours at temperatures of 60°C, at ambient pressure and under static conditions.

APPLICATIONS

- Fast acting scale dissolver for anhydrite, gypsum, and other forms of calcium sulfate (CaSO_4)
- Applicable for pipelines, storage and processing facility equipment
- Can be effectively applied at temperatures ranging from 25°C to 80°C

FEATURES

- Fast-acting chemistry
- Non-corrosive towards most oilfield metallurgies
- Formulated for low emulsion tendency
- Non-hazardous products

BENEFITS

- Eliminates long soak times
- Safer treatment compared to acid based solutions
- Efficient dissolution of oil-wet scale deposits
- Easy to store, transport and handle
- Compatible with most commonly used elastomers
