

SureGL™ H

REHEALING GEL SYSTEM

OVERVIEW

SureGL™ H is one of the industry's most popular and widely used fluid systems. It provides versatile and dependable performance over a broad range of applications. This aqueous based gel can be designed to suit the required purpose. The chemistry of the system imparts a re-healing property to the gel after shearing. It can also be designed with an internal breaker for easier removal.

SureGL H can be run as a linear or complex gel with excellent debris carrying capacity, making it the ideal choice for debris pickup, product separation, as well as lubrication applications. The components of the gel are readily available and easy to mix.

APPLICATIONS

- Debris pick up and cleaning operations
- Product separation
- Lubrication
- Change of service
- Cleaning of unpiggable pipelines
- Pick up lost objects in a pipeline

FEATURES

- Shear healing effect
- Ability to be mixed in seawater or brines
- Easy to mix
- High viscosity fluid

BENEFITS

- Crosslinked fluid reheals after shearing
- Reduced offshore equipment footprint
- Ability to run semi-continuously or batch mixed
- Excellent debris carrying capacity
