

# SureDsolv™ F

## FOAM BASED SOLUTIONS

### OVERVIEW

SureDsolv™ F products are used as foaming agents that can help lower surface tension. They are very versatile in their applications and can be used to enhance the efficiency of cleaning operations, as foaming agents as well as act as non-emulsifiers in some cases. The products can be foamed using either air, CO<sub>2</sub> or N<sub>2</sub> gas.

The non-ionic and amphoteric products are compatible with a broad range of other treatment additives.

Foam generated using SureDsolv F is high quality, high expansion with high stability and excellent retention time. Some can even have a consistency similar to shaving foam.

#### APPLICATIONS

- Generates high quality foam with excellent stability
- Provides non-emulsification properties
- Can be used to prepare gel-based foam
- Suitable for pipeline and process applications
- Foam based cleaning of external surfaces of process equipment

#### FEATURES

- High quality, high expansion foam
- Non-ionic and amphoteric products
- High flash point products
- Can be foamed with CO<sub>2</sub>

#### BENEFITS

- Excellent surface tension reducer
- Compatible with other additives
- Easy to transport and store
