

PIPELINE AND PROCESS SERVICES | CHEMICALS

SureDcon™ V

Cleaning and decontamination chemical

APPLICATIONS

- Removes tenacious hydrocarbon films and organic matter
- Reduces benzene, contaminant and Total Exposure Limit (TEL) levels
- Treats Pyrophoric Iron
- Applicable to decontamination by degassing, circulation or sparging

FEATURES

- Neutral pH
- Soluble in water
- Non-hazardous product
- Dispersible in aromatics

BENEFITS

- Reduces equipment downtime
- Can be injected into water or steam
- Significant savings in labor, water requirement and waste generated
- Easy to transport, store and handle

Overview

SureDcon™ V is a decontamination and cleaning agent for use in oilfield applications. The chemistry provides effective solutions for liquid phase and vapor phase decontamination. It is primarily used for cleaning of the process facility equipment during shut-downs or turn-arounds. It also addresses Iron Sulphide by solubilizing it in water to remove it from the system.

SureDcon V promotes rapid emulsification of hydrocarbons in water during equipment and storage tank cleaning and degassing operations. The methods of applying the cleaning solution include injecting with steam, recirculation, cascading, sparging and spraying.
