

SureStart™ M

SINGLE FILL PRE-OPERATIONAL CLEANING PROCESS

OVERVIEW

SureStart™ M is a proprietary acid-based precommissioning cleaning process that provides degreasing, scale removal, neutralization, and passivation with only one solvent fill. It is a low-chloride cleaning option that can be custom designed to meet specific requirements.

This process offers considerable savings in labor, time, water, and waste disposal costs as cleaning is performed with only one fill volume. The unique properties of this solution make it an ideal choice for pre-operational cleaning.

APPLICATIONS

- Pre-operational cleaning of process equipment
- Can be applied to systems with mixed metallurgies without the need to perform separate cleaning programs

FEATURES

- Removes oils/greases, millscale/iron oxide normally with a single fill of cleaning solution
- Passivates metal surfaces

BENEFITS

- Significantly reduces cleaning time
- Helps protect against after-rusting
- Does not require intermediate filling and draining
- Time and waste efficient process
