

SureDscale™ B

BARITE SCALE DISSOLVER

OVERVIEW

SureDscale™ B offers effective dissolution of barite (BaSO_4) scale or minerals. The chemistry is only intended for the removal of BaSO_4 scale deposited in pipelines and process facilities such as storage tanks, piping or exchangers.

SureDscale B scale removal products are non-damaging to most oil field metallurgies. For heavily scaled pipelines at low temperatures please get in touch with a local Halliburton representative.

APPLICATIONS

- Fast acting scale dissolver for barite (BaSO_4) scale or minerals
- Applicable for scale removal from pipelines, process and storage facilities

FEATURES

- Fast-acting chemistry
- Non-corrosive towards most oilfield metallurgies
- Very effective in high temperature applications
- Formulated with a low emulsion tendency surfactant

BENEFITS

- Eliminates long soak times
- Non-hazardous products that are very easy to store, transport and handle
- Compatible with most commonly used elastomers
- Can be applied to oil-wet scales
