

# SureStart™ D

## ALKALINE DEGREASING CHEMISTRY

### OVERVIEW

SureStart™ D is a degreasing agent used during pre-operational cleaning of process equipment. The chemistry saponifies certain oils and greases. This family of products offers various formulations for degreasing based on the equipment manufacturer recommendations, type

of equipment, metallurgy, temperature and contact time. This ensures the flexibility to be able to tailor the treatment to the specific requirement as compared to pre-blended degreasing agents.

#### APPLICATIONS

- Pre-operational degreasing of process equipment
- Can be used for cleaning of any process equipment
- Removal of heavy oils or grease to avoid foaming

#### FEATURES

- High flash-point products
- Formulations for sensitive metallurgies

#### BENEFITS

- Products that are safe to store, transport and handle
- Tailored chemistry allows flexibility to adapt to equipment manufacturer guidelines
