

SureDfend™ B

BIOCIDES FOR OILFIELD WATER SYSTEMS

OVERVIEW

SureDfend™ B provides highly effective biocides used for micro-organism and iron sulphide control in oilfield water systems. This is the ideal choice in the oil production industry, where its multifunctional performance in controlling bacteria as well as dissolving iron sulphide delivers operational cost reduction and environmental benefits.

SureDfend B provides higher bacterial kill performance with shorter contact times compared to other products. The surfactant properties of the products provide a high level of biofilm and sludge penetration, resulting in quick and effective sessile bacterial kill performance.

APPLICATIONS

- Treatment for water injection and hydrotest applications
- Can be used for pipeline and process applications
- Effective control of bacteria and iron sulphide
- The chemistry can also be applied as a batch treatment between pigs

FEATURES

- Rapidly acting, powerful biocides
- Dissolves iron sulfide
- Readily biodegradable
- Formulated with a biofilm and sludge penetrating agent

BENEFITS

- Effective on a wide range of micro-organisms
- Cost reduction from multifunctional performance
- Reduces corrosion
- Superior performance with shorter contact time

Sales of Halliburton products and services will be in accord solely with the terms and conditions contained in the contract between Halliburton and the customer that is applicable to the sale. H014236 06/22 © 2022 Halliburton. All Rights Reserved.
