

SureDscale™ F

IRON SULPHIDE DISSOLVER

OVERVIEW

SureDscale™ F is a proprietary differentiating solution to address various production challenges associated with the presence of iron sulphide scale deposits. The chemistry is applicable to process facilities.

Conventional solutions such as mineral and organic acids, oxidizers, acrolein, THPS and various THPS blends pose high total cost of operation challenges for oil and gas producers. SureDscale™ F technology addresses these challenges by providing a fast-acting dissolution to iron sulphide, without the release of H₂S gas.

APPLICATIONS

- Fast acting iron sulphide scale dissolver
- Applicable for scale removal from process facilities

FEATURES

- Fast-acting chemistry
- Non-corrosive towards most oilfield metallurgies
- Formulated with a low emulsion tendency surfactant

BENEFITS

- Eliminates long soak times
- Non-hazardous products that are very easy to store, transport and handle
- Can be used to dissolve oil-wet scale
- No H₂S gas is released when iron sulphides are dissolved
- Compatible with most commonly used elastomers
- Very effective at both low and high temperature applications
