

Introducing the EF Global Challenge Honors Semester featuring Nobel: A study abroad experience like no other, in Sweden and Spain

Earn 15 college credits at the University of Granada as you and your team members design innovative solutions to some of the world's most pressing problems, presenting your findings in Stockholm during your culminating experience in December. Inspired by Alfred Nobel's belief that ideas can change the world, you will be challenged to question conventional wisdom throughout your semester experience, and then have the opportunity to observe and learn from Nobel laureates and other leading world thinkers at the annual Nobel Week Dialogue event in Stockholm.
