

# LIMITED ACCESS VPN USING MFA USER GUIDE

## Introduction

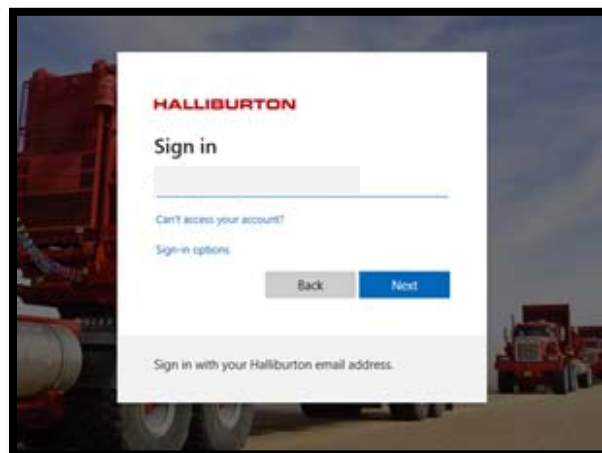

This document explains the use of Limited VPN with MFA verification for employees to connect to the Halliburton network when you are not at a Halliburton location and not using a Halliburton PC. MFA is part of the new Account Management experience supporting the Office 365 transformation and provides additional authentication methods to better secure your Halliburton account.

Prerequisites for using Pulse Secure with MFA verification:

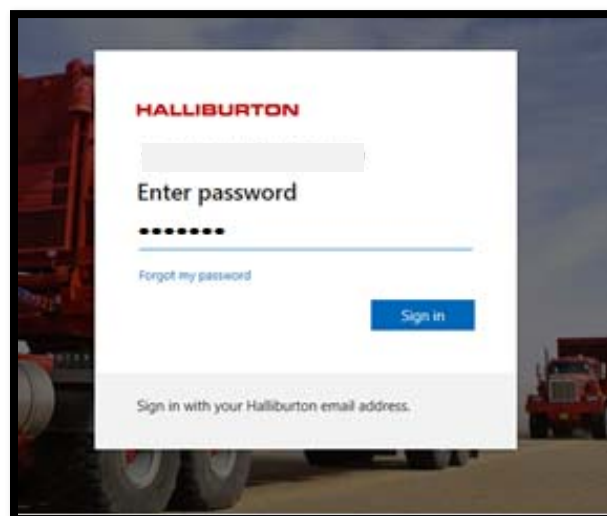

- Complete enrollment for Account Management MFA

## Steps to Use Pulse Secure

1. On <http://www.halliburton.com/connect>, click on the Halliburton Employee (Limited VPN Access) link.
2. Log into your Halliburton account using your email address.

Enter your Halliburton Domain Password.

# LIMITED ACCESS VPN USING MFA USER GUIDE

- Use the preferred authentication method you set up during enrollment to validate your identity. The example below shows the default method using the Microsoft Authenticator app.

- Provide your Halliburton Network ID (e.g.: hba9999) and Domain Password

A screenshot of the Halliburton Limited VPN login page. The page features the Halliburton logo at the top left. Below the logo, it says "Welcome to Halliburton Limited VPN" and "Sign in below with your Halliburton 7 digit ID - ex. hba9999". There are two input fields: "Halliburton Userid" with the value "hba9999" and "Halliburton Password" with masked characters. A "Sign In" button is located below the password field.

- Authentication is complete and the Limited VPN portal will load as shown below.
