

# European *CirculenRecover* Product Grades

Product	Color	Process	Type of application	Application examples	% PCR	Density 23°C [g/cm³]	MFR 190°C/2.16Kg [g/10min]	Tensile / Charpy 23°C [MPa] / [ kJ/m²]
<i>CirculenRecover</i> HDPE								
HD5603*	Silver / Ivory	Extrusion Blow Molding	Small and medium blow molded bottles	Non-food consumer goods, bottles, tubes and toys	98	0.956	0.3	1200 / 2.5
HD45U06	Natural	Extrusion Blow Molding	Large blow molded containers	Industrial packaging, IBCs, jerry cans	40	0.945	HLMI 6 [190°C/2.16Kg]	850 / 150
Product	Color	Process	Type of application	Application examples	% PCR	Density 23°C [g/cm³]	MFR 230°C/2.16Kg [g/10min]	Tensile / Charpy 23°C [MPa] / [ kJ/m²]
<i>CirculenRecover</i> PP								
PP300P	Grey / Ivory	Injection molding	Non-food consumer goods packaging, compounds	Caps, simple closures, houseware, compounds	98	0.916	16	1300 / 5
PP300R	Grey / Ivory	Injection molding	Non-food consumer goods packaging, compounds	Hinge caps, pump caps, dispensers, houseware, compounds	98	0.916	21	1250 / 5
PP300S	Grey / Ivory	Injection molding	Closures, houseware, sports equipment	Over caps, crates, indoor furniture	98	0.916	36	1250 / 4.5
PP300T	Grey / Ivory	Injection molding	Thin wall packaging containers, houseware	Furniture, laundry pods, lids, pails	98	0.916	50	1250 / 4.5
PP300U	Grey / Ivory	Injection molding	Thin wall packaging containers, houseware	Laundry pods, lids, pails	98	0.916	70	1250 / 4.5
<i>CirculenRecover</i> PP - Impact grades								
PP189P	Ivory	Injection molding	High impact resistance at low temperature	Outdoor furniture, luggage, bins, sports equipment, thermal equipment	85	0.918	15	800 / 30
PP249S	Grey / Ivory	Injection molding	High impact resistance at low temperature	Outdoor furniture, luggage, bins, sports equipment, thermal equipment	70	0.916	28	850 / 40

All PCR products are not intended for highly regulated applications such as food contact, portable water contact, medical and pharmaceutical

\*HDPE also available in vented version.

# CirculenRecover

Plastics make modern society possible and often are a more sustainable material than alternatives. LyondellBasell recognizes the challenges of plastic waste and is launching products that help customers achieve circularity in their use of plastic packaging by increasing usage of recycled content and diverting more plastic from landfill or incineration. **We are committed to producing and marketing at least two million metric tons of recycled and renewable based polymers annually by 2030.** We are advancing technologies and innovations that will help eliminate plastic waste and maximize the value of plastics by keeping these resources in use for as long as possible.

## Polyethylene and Polypropylene products containing Post Consumer Resin (PCR) for the following applications:

### Injection Molding

- Caps and closure
- Crates, pails, containers, houseware, outdoor furniture, luggage, sports equipment

### Blow Molding

- Bottles for consumer goods

### Flexibles

- Collation shrink film
- Hygienic film

# Circulen Family of Sustainable Solutions

Through its *Circulen* polymer portfolio, LyondellBasell enables brand owners to address multiple packaging sustainability and circularity challenges. From mechanical and advanced recycling solutions that divert plastic from landfills to renewable-based solutions that offer greenhouse gas (GHG) emission benefits, the *Circulen* polymer portfolio offers the industry's broadest range of sustainable packaging solutions.

## **Circulen**Recover

Used in a wide variety of industrial, household and consumer product applications, **CirculenRecover** products are made from plastic waste through a mechanical recycling process. This type of recycling upgrades plastic waste into usable materials through mechanical processes including sorting, washing, grinding, melting and forming new pellets. The resulting polymers can also be blended or compounded with traditional fossil-based products, providing customers with high-quality polymers with an optimal balance of performance characteristics and recycled content.

## **Circulen**Revive

Products are made using an advanced recycling process to convert plastic waste back to its molecular level. The resulting pyrolysis oil is then used as a feedstock in our conventional production processes to produce new polymers. A broad range of plastics can be recycled using this process including hard-to-recycle items such as mixed materials, composites, multilayer and flexible plastics. The advanced recycled feedstock is mixed with conventional feedstocks in our process, and allocated to **CirculenRevive** products using a mass balance approach certified according to the International Sustainability and Carbon Certification (ISCC) PLUS standard. These polymers can be used in highly regulated applications such as food contact and healthcare.

## **Circulen**Renew

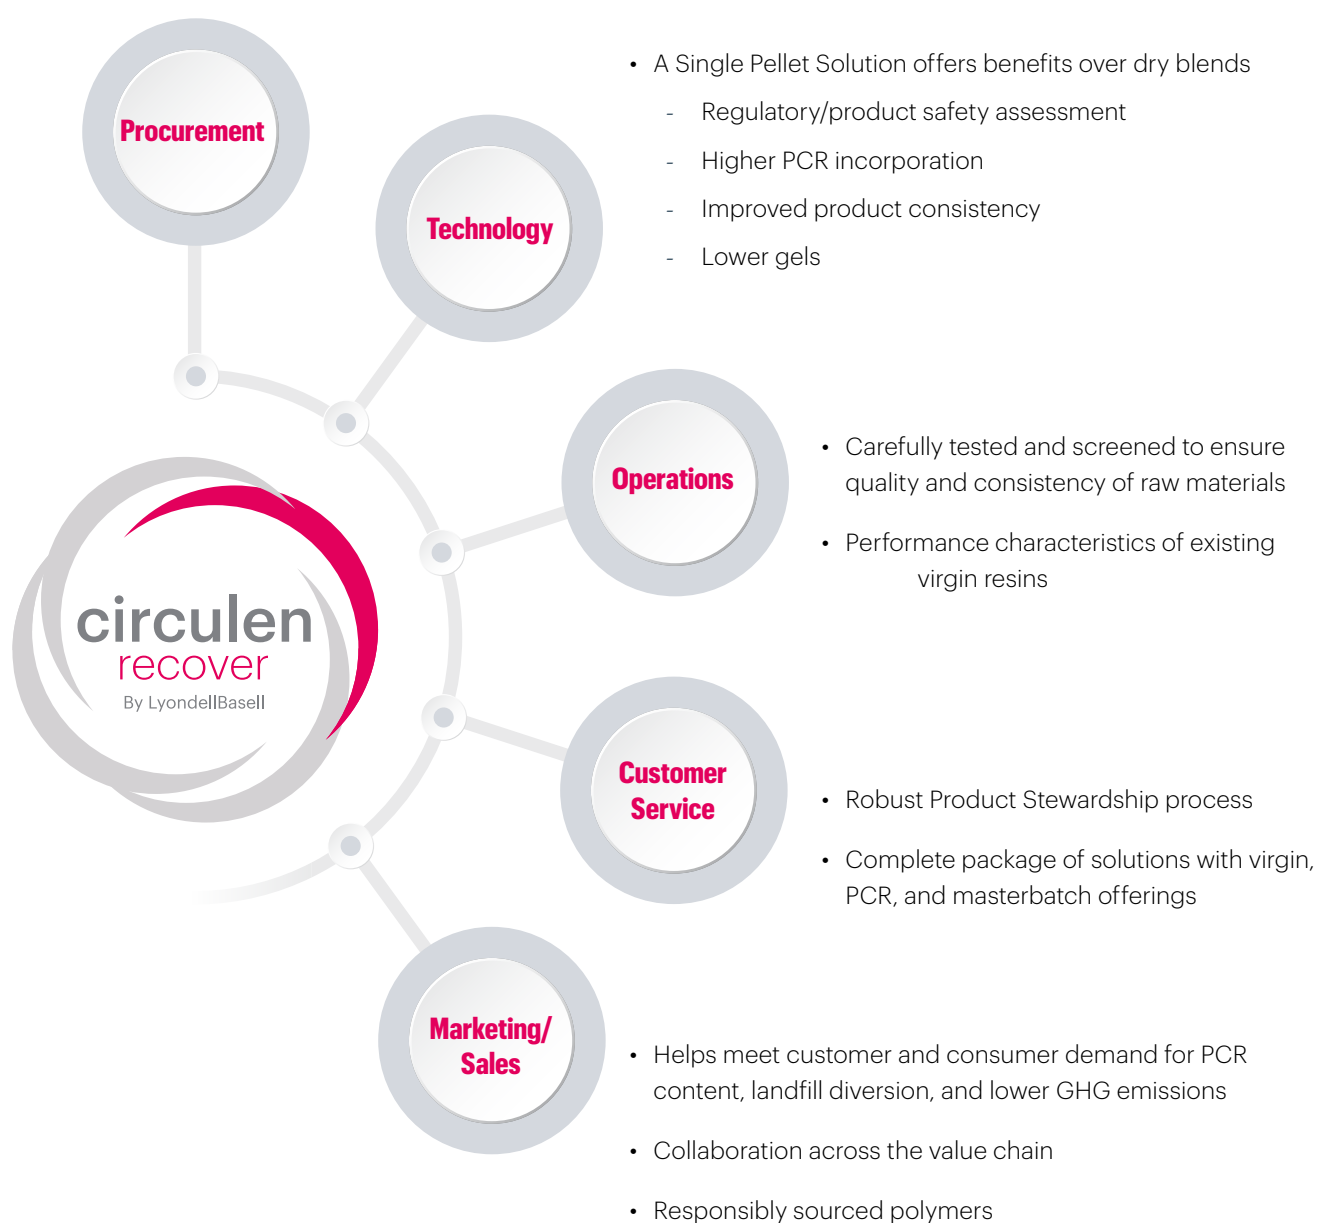

Offering a lower carbon footprint than fossil-based polymers, **CirculenRenew** products are sourced from renewable feedstocks, namely bio-based wastes and residual oils, such as used cooking oils. These feedstocks are used in our conventional production processes along with conventional feedstocks, and are allocated to **CirculenRenew** products using an ISCC PLUS-certified mass balance approach. These polymers can also be used in highly regulated applications such as food contact and healthcare.

# Unlock the value of *CirculenRecover*

LyondellBasell is investing across the value chain – from collection to offtake to production – to ensure the reliable supply of high-quality feedstock necessary to deliver meaningful circular and low carbon solutions to our customers. Our **CirculenRecover** grades are specifically designed to fulfill the unique needs of multiple stakeholders across your organization while also addressing the most pressing demands of your customers and consumers.

- Long term supply contracts
- Reliable feedstock supply

# About Us

We are LyondellBasell (LYB) – a leader in the global chemical industry creating solutions for everyday sustainable living. Through advanced technology and focused investments, we are enabling a circular and low carbon economy. Across all we do, we aim to unlock value for our customers, investors and society. As one of the world's largest producers of polymers and a leader in polyolefin technologies, we develop, manufacture and market high-quality and innovative products for applications ranging from sustainable transportation and food safety to clean water and quality healthcare. For more information, please visit [www.lyb.com](http://www.lyb.com) or follow [@LyondellBasell](https://www.linkedin.com/company/lyondellbasell) on LinkedIn.

Before using a product sold by a company of the LyondellBasell family of companies ("LyondellBasell"), users should make their own independent determination that the product is suitable for the intended use and can be used safely and legally. LyondellBasell MAKES NO WARRANTY, EXPRESS OR IMPLIED (INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE) OTHER THAN AS AGREED TO BY LyondellBasell IN THE PRODUCT SALE CONTRACT.

LyondellBasell prohibits or restricts the use of its products in certain applications. For further information on restrictions or prohibitions of use, please contact a LyondellBasell representative.

Users should review the applicable Safety Data Sheet before handling the product.
