

Icorene grade 1490

Super high flow LMDPE powder, specifically designed for rotomolding applications

Exceptional pinhole-free processing, excellent impact resistance and ESCR

Icorene 1490 is a new generation hexene based medium density (LMDPE) polyethylene. This unique grade has excellent ESCR (Environmental Stress Crack Resistance) and achieves at ultra low PIAT (Peak Internal Air Temperature) a pinhole-free surface.

With superior performance in ARM impact resistance @-40°C, even at low PIAT of 150-170°C, Icorene 1490 is unique in having the broadest processing window while maintaining 100% ductility.

Icorene 1490 is fully UV stabilized and is such a versatile grade that it can be used in many different applications, especially where shorter oven times are desired.

A perfect example of a challenging application for this Icorene 1490 powder grade is industrial floor cleaning machines. These require a high meltflow but also high stress crack resistance, high impact strength and no surface pinholes.

Another application that benefits is outdoor furniture where rotomolders need a pinhole-free surface finish, toughness and wide processing window.

Features

- Hexene based material
- Very wide processing window with excellent mechanical properties
- Shorter oven times, reducing carbon footprint
- Good surface finish with no pinholes
- Excellent ESCR BTT and FNCT
- Ultra low PIAT possible
- High impact resistance at -40°C
- Easy processing
- Low shrinkage
- Fully UV- and heat-stabilized
- Available in color compounds

Specific applications

About us

We are LyondellBasell (LYB) – a leader in the global chemical industry creating solutions for everyday sustainable living. Through advanced technology and focused investments, we are enabling a circular and low carbon economy. Across all we do, we aim to unlock value for our customers, investors and society. As one of the world's largest producers of polymers and a leader in polyolefin technologies, we develop, manufacture and market high-quality and innovative products for applications ranging from sustainable transportation and food safety to clean water and quality healthcare. For more information, please visit www.lyb.com or follow [@LyondellBasell](https://www.linkedin.com/company/lyondellbasell) on LinkedIn.
