TECHNICAL DATA SHEET

Identification of the product and of the company/undertaking

Product identifier

Mirka® Galaxy abrasives

Details of the supplier:

Company: Mirka Ltd
Address: Pensalavägen 210
FI-66850 Jeppo, Finland
Phone: +358 20 760 2111
National contact: sales@mirka.com

Description

The ceramic grains of the Galaxy are engineered not to dull, as once the edge of the abrasive grain breaks off it simply forms new edges, making it possible for the Galaxy to continue cutting – from edge to edge. The self-sharpening ceramic grains allow for a winning combination of long life, fast cut and easy polishability.

Thanks to the optimized Multifit hole configuration, the abrasive is always correctly placed on any machine without the need to specifically align it.

At its core, the Mirka Galaxy is a multi purpose product, suitable for the sanding of both soft and hard materials as well as various substrates. Superb edge wear resistance, excellent clogging resistance, dust repellent coating, and optimal dust extraction - the Mirka Galaxy serve well in the automotive sector, in vehicle manufacturing, collision repair, marine production as well as in the wood sector.

Technical Specifications

Grain	Ceramic/Aluminium oxide
Color	Blueish
Backing	Polyester film
Bonding	Low VOC resin system
Coating	Semi-open

Suited for

Automotive Refinishing
Wood processing
Marine Industry
Vehicles Manufacturing

Suitable Materials

Steel, Mild steel / carbon steel, Non-ferrous metal, Paint stripping / removal, Plaster / Putty, Synthetic materials, Chipboard, Solid surface, Stainless steel, Composites, Veneer, Plastics, Primer, Paint sanding, Body filler, Hard wood, Soft / Resinous wood, Lacquers, MDF / HDF, Gel coat, Glass fibre
