2. Product description

These hard grip backing pads are engineered for high-performance applications where stability and durability are essential. Featuring a Quick Lock attachment system, they enable fast, secure pad changes, boosting workflow efficiency in both industrial and collision repair environments.

3. Properties

- Injection molded rigid polyamide backing (PA66, base material DuPont ST801).
- The plastic backing is joined by self-adhesive glue to a laser-cut grip material (knitted fastener with mushroom-shaped gripping elements).
