

Conga Composer: Editions

Generate complete, accurate documents anywhere with data from everywhere

Accelerate your business with data-driven document generation

Conga Composer embeds document generation into current workflows to speed up business cycles. Documents are populated with data from any source to ensure completeness and accuracy and then saved to a single source where the most up-to-date documents can be accessed. This brings you an elevated customer experience while maintaining brand consistency.

Conga Composer customers get access to all features of our product no matter the edition purchased. Everyone gets our best product. There is no functionality or performance difference between our editions.

Conga Composer Editions

	Business Edition	Premium Edition	Advanced Edition
Monthly transactions (per user)	20	30	50

Editions are defined by:

Monthly transactions (per user): Each licensed user can generate up to this number of monthly transactions, which can be used at any point during the full subscription term and pooled across all users.

Ex: Purchasing 100 seats of Business Edition comes with 2,000 total monthly transactions that can be used for any document generation (including Conga Batch, Conga Trigger, and Conga Composer API). This equates to 24,000 annual transactions.

Advanced Usage: Transactions

Advanced usage transactions can be purchased in one of two ways:

- 1) If you buy seats, you will be allocated a certain number of transactions dependent on the edition you purchase (Business, Premium, Advanced). If you need additional transactions to support your use case in addition to your pooled allotment, you can purchase additional Advanced Usage transactions.
- 2) You can purchase Advanced Usage transactions standalone to support fully automated use cases. Examples include embedding eSignature into your website, portal, application, or automating other actions or flows. In these instances, you would be given one Admin seat to manage the API, as there would be no need for additional seats. If you need additional seats for your business, you can buy additional seats under our 3 offered editions.

Conga Composer - Features and Data Limits

All editions of Conga Composer include these features and data limits.

Features	Benefit
Document generation	Automate the process of document creation by using templates, rules, and data. (Requires transaction usage)
File formats	Generate documents to address any use case with multiple template formats, including DOCX, XLSX, PPTX, PDF, and HTML email.
Conga Composer API	Embed document generation anywhere your employees and customers need. Merge data into documents from any system of record, from CRMs and ERPs, and even homegrown systems. With the API, you can store templates in: OneDrive, SharePoint, Salesforce, Google Drive, Box, Dropbox, and S3. (Requires transaction usage)
Data formatting	Tables, images, rich text, charts, dashboards, custom fonts, watermarks, dynamic formulas, and global currencies.
Conditional generation	Conditionally display sections of a document, group data, and calculate formulas according to business rules.
Live edit	Preview and edit your document before it's delivered according to the specified method like email or download.
Email Template Options	Use email templates from Salesforce email or Conga Email Templates.
Email Delivery	Deliver documents via email incorporated into Conga Composer. Use Salesforce, SendGrid, and/or Amazon SES.
Store Files	Save a copy in Salesforce, Google Drive, Microsoft OneDrive, SharePoint*, Box, DropBox*, Amazon S3, and SFTP*. <i>*API only</i>
Custom branding	Custom brand the Conga Composer Interface with your logo to increase brand consistency and awareness. (For legacy Composer Classic UI, not available for Conga Composer lightning component)
Integration with eSignature	Integrate with Conga Sign, Adobe Sign, Sertifi, OneSpan, and DocuSign.
Integration with cloud security provider (CASB)	Integrate with third party data encryptions such as CipherCloud and Perspecsys.

Conga Composer features specific to Salesforce

Features	Benefit
Conga Batch	Run the same Conga Composer solution for many records all at once or at recurring intervals. (Requires transaction usage)
Conga Trigger	Create and deliver documents automatically by setting up a Salesforce workflow rule. (Requires transaction usage)
Salesforce data merge	Merge data from standard or custom Salesforce objects.
Salesforce master object	Use any standard or custom Salesforce object.

Update Salesforce	Log activities, update fields in Salesforce, and post message in Chatter.
Salesforce Community	Included support for Salesforce Partner and Customer Community Plus.
Send via link	<i>Attachment sizes for outbound emails are no longer a concern with multiple attachments and large file sizes.</i>
Notification, tracking, and history	Receive real-time engagement notifications when a document has been viewed, who has viewed it, and for how long to ensure timely follow up.
Recursive merge	Merge a secondary Salesforce field value into a primary Salesforce field value.

Product Data Limits

Product Component	Limit
Salesforce Reports per Conga Composer solution (Tabular and Summary Reports only)	100
Rows per Salesforce report	5,000
Rows per Conga Composer solution (all Reports and Queries combined)	50,000
Queries per Composer solution	100
Rows per query	25,000
Template size	10 MB
Number of templates per operation	40
Number of attachments per operation	150
Aggregate template size (when specifying multiple templates to use in the merge process)	18 MB
Aggregate output size	250 MB
Columns per worksheet in View Data workbook	256
Querystring variable	6

Conga Composer is a critical component of Conga Revenue Lifecycle Cloud, a set of unified products built on Conga Platform that enable you to crush your unique revenue lifecycle complexities and increase revenue certainty. Conga's open, flexible, and high-performance solution unifies, automates, and standardizes revenue processes across all teams to maximize customer lifetime value.
