

DATA SHEET

Conga Composer for the public sector

Beautiful, accurate digital documents with the click of a button

Achieve a higher level of productivity with data-driven document generation

Whether you have inter-agency correspondence to send out, task order updates, acquisition regulations, loan applications to process, inspection reporting, case management documents, or other presentations and reports that keep business running smoothly year after year, documents are at the core of your organization.

With Conga Composer, you can easily create, share, and edit perfect digital documents every time, directly populated with your data. Use pre-built templates to automatically create engaging, organization-specific documents with a single click. Send accurate, consistent communications that enhance productivity and mitigate risk.

Challenges

- Outdated, tedious, and paper-heavy processes require manual copying and pasting
- Old templates often contain incorrect data and out-of-date acquisition regulations
- Finding and accessing current, accurate documents is a constant struggle
- Inconsistencies and mistakes can hinder productivity

Key benefits

- Streamline document creation processes and speed up organization workflow
- Reduce resource requirements and increase operational efficiency
- Automate to eliminate manual tasks
- Capture and retain centralized institutional knowledge
- Save to a centralized repository where the most up-to-date documents can be accessed

Composer Net Promoter Score

4.5/5

Average G2 Rating

83% of leaders believe digital document transformation has or will dramatically improve overall productivity

Composer has the features you need to streamline document generation from start to finish.

- **Document generation:** Automate the document creation process using templates, rules, and data.
- **File formats:** Generate documents for any use case with multiple template formats, including DOCX, XLSX, PPTX, PDF, and HTML email.
- **Merge data:** Merge data from standard or custom Salesforce objects.
- **External data:** Merge data stored in nonSalesforce databases into your Composer template.
- **Data formatting:** Use tables, images, rich text, charts, dashboards, custom fonts, watermarks, dynamic formulas, and currency.
- **Conditional generation:** Conditionally display sections of a document, group data, and calculate formulas according to organization workflow.
- **Live edit:** Preview and edit your document before it's delivered according to the specified method (like email or download).
- **Update Salesforce:** Log activities, update fields in Salesforce, and post messages in Chatter.
- **Store files:** Save a copy in Salesforce, Google Drive, Microsoft OneDrive, Box, and Amazon S3.
- **Send via link:** Attachment sizes for outbound emails are no longer a concern with multiple attachments and large file sizes.
- **Notifications, tracking, and history:** Receive real-time engagement notifications when a document has been viewed, including who has viewed it and for how long.
- **eSignature:** Securely send documents that are ready for electronic signature using Conga Sign.
- **Custom branding:** Custom brand the Composer interface with your organization logo to increase consistency and awareness.
- **API:** Create your own interface as part of another application.
- **Integration with cloud security provider (CASB):** Integrate with third-party data encryptions CipherCloud and Perspecsys.
