Upgrade assessment, planning and new feature rollout. Tailored recommendations at critical milestones of your implementation

Accelerate success with personalized services from Conga Experts

Conga Architect Scope

What is an Advisory Request?

An Advisory Request is a request for design, best practice, consultation or solution advise. Advisory Requests are modular (up to 5 hours each). Depending on the scope of the service, an Advisory request may be broken into multiple requests.

The Conga Architect offering is flexible and provides access to a named/designated Architect. This allows customers to purchase multiple units or multiple levels to manage their solution complexity and unique business needs.

Advisory and Consultation

- One on one consultation with an Architect
- Participation and guidance in design workshops
- Best practice recommendations

Solution Review and Health Check

- End-to-end solution and end user challenges review
- Solution optimization for scalability and performance
- Performance tuning recommendations

Solution Design

- On going solution design analysis to maximize out of the box capabilities
- Process improvements and adoption of best practices
- Fit Gap Analysis & New Feature Enablement

Roadmap Development and Adoption

- Upgrade assessment & readiness planning
- Recommendations on the long-term solution roadmap
- Guidance on adoption and global roll outs
