TOPCON
CLOUD

Provide a safe, secure and private home for your patient exam data – all in the cloud.

As a software-first company with decades of clinical experience and leading ophthalmic devices, Topcon Healthcare Solutions is designing and developing its products to realign business success along with customer success. This is accomplished by promoting better user experiences through the consumerization of IT in addition to providing diagnostic applications that help clinicians make difficult diagnostic decisions.

Discover peace of mind for less than $15/mo.

With the continuous growth of medical practices and an increasing number of patients that are attended daily, local storage on each instrument is reaching capacity. Clinics are required to find alternative ways to store patient exam data, which in turn can be time consuming and costly.

Topcon CLOUD is the simplified solution. Healthcare professionals now have peace of mind when it comes to storing and archiving their data while having control over a secure backup and archive solution in the cloud.

FEATURES AT A GLANCE

Automated   Scalable   Affordable   Secure

Discover Topcon Cloud today.
