

# TOPCON HARMONY<sup>®</sup>

**Clinical Data Management tailored for you.**

With customizable Clinical Views to help you make a faster diagnosis or treatment decision.

## Age-related macular degeneration (AMD)

Harmony is a comprehensive data management and communication platform for eye care. Its customizable Clinical View layout is a powerful tool for eye care specialists to efficiently access, review, and document patients' diagnostic data at a glance. The healthcare professional is in complete control and can arrange the screen layout based on the disease entity, in this case, AMD, to save time and increase efficiency.

The **overlay tool** allows sequential visualization of multiple imaging modalities

OCT viewer with reference fundus image and B-scan scrolling

The **timeline feature** shows the examinations performed over time to provide a complete picture of the patient's journey

Magic Lens tool **enables analysis of multiple imaging modalities** in an isolated area of interest

# TOPCON HARMONY®

**Clinical Data Management tailored for you.**

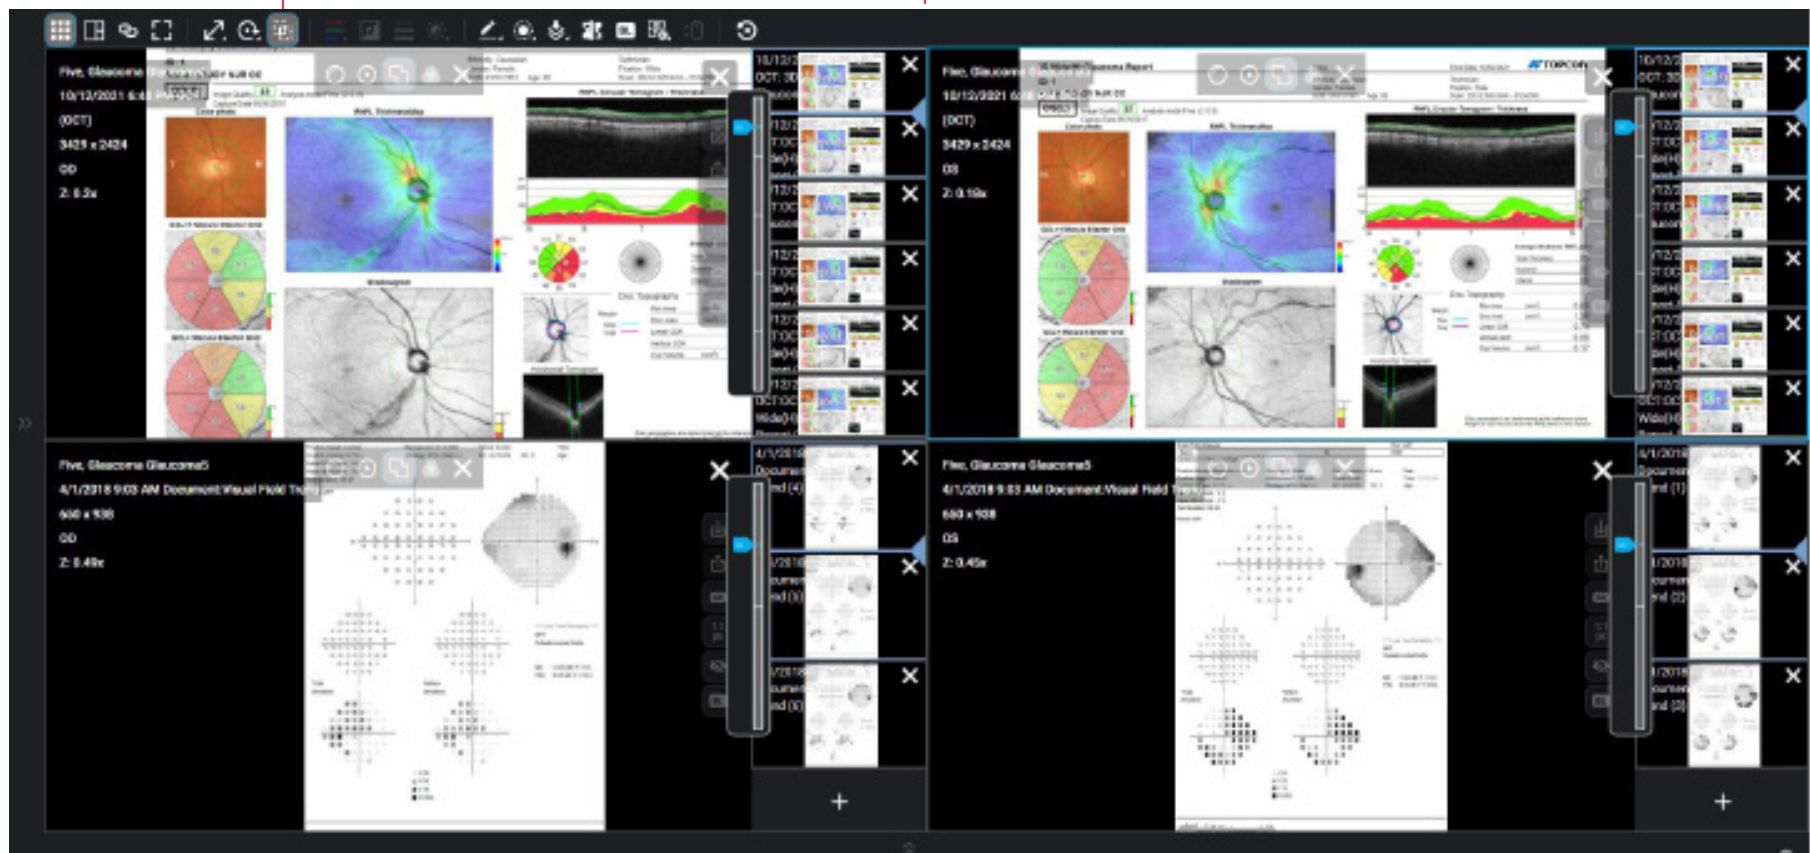

With customizable Clinical Views to help you make a faster diagnosis or treatment decision.

## Glaucoma

Harmony provides eye care professionals with convenient navigation and analysis tools for parallel image review so they can easily monitor progression over time and quickly identify a significant change in complex diseases such as the Glaucoma case shown below.

**The overlay tool** allows comparison of examination items throughout the course of the patient's treatment

**Side-by-side comparison** of all available OCT and visual field reports

**The Slider tool enables a dynamic 'fly through' option** to visually inspect patterns of change
