Experience the power of DIRECT

Topcon Healthcare is now a direct sales and service model in the United States. By connecting with your local Topcon representative, you will gain access to exclusive offers, responsive support, and efficient communication. Discover the benefits of direct sales, comprehensive solutions, and the support of an industry-leading customer care team.

Consultative relationship with customized solutions

Our product portfolio is extensive. From robotic OCTs and fundus cameras to innovative binocular perimeters, from chairs and stands to pre-test equipment and digital refraction, Topcon Healthcare has everything you need to support your growing practice. Together, we're working toward our vision of **Healthcare from the Eye**[™] – a connected care ecosystem using AI-powered disease detection and management applied to noninvasive retinal imaging.

Responsive support from the device manufacturer

Factory-direct pricing and exclusive offers

OPTICAL COHERENCE TOMOGRAPHY

Triton[™]

Multimodal Swept-source OCT

OVERVIEW

Multimodal Triton performs OCT, fundus

photography, FA, and FAF imaging¹

Deep Penetration

Image through media opacities to successfully scan more patients

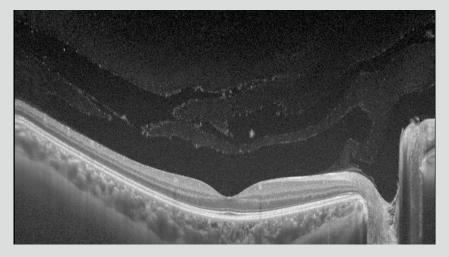

Image Quality

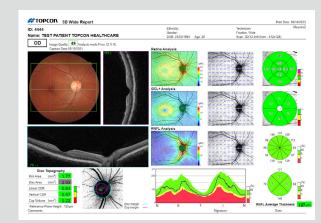

Swept-source image quality enhanced with PixelSmart[®] processing²

1 DRI OCT Triton Plus only. 2 PixelSmart[®] is a function of IMAGEnet[®] 6 software

Triton SS OCT with PixelSmart Image Quality

12 x 9mm 3D Wide Report

Maestro2

Robotic OCT & True Color Fundus Camera

OVERVIEW

Efficiency

Rapid and simple operation with one-touch acquisition of SD OCT, OCTA and true color fundus image

Comprehensive Reporting

Analyze the retina, optic disc, and anterior segment and simplify diagnostic decision making

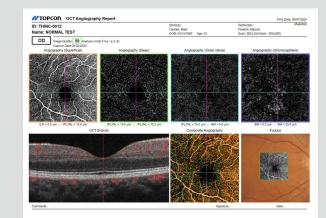

High Quality Imaging

Clear, detailed OCT, OCTA and true color fundus images reveal pathology in beautiful detail¹

1 True, full color fundus image simultaneously captured with white light, 24-bit color

OCT Angiography

RETINAL IMAGING

NW500

Non-Mydriatic Retinal Camera

NW500 is a user-friendly, robotic fundus camera that provides sharp-quality, consistent imaging even in ambient light.¹

OVERVIEW

Robotic

Fully-automated focus and capture of high-resolution fundus photos

Small Pupil Photography

Acquire images through pupils as small as 2.0mm² in diameter

Image Quality

Enhanced image quality with 12MP sensor^{3,4}

1. A brightness of 623 lux or less 2. Confirmed with model eyes 3. Compared to Topcon non-mydriatic retinal camera TRC-NW400 4. Actual image size is 7.1MP

PERIMETRY

Perimeter

TEMPO improves the visual field testing experience for patients and enables effective testing from screening through advanced glaucoma without compromising accuracy.

The unique binocular design makes testing faster and more comfortable.

OVERVIEW

Fast

39% faster than standard automated perimetry (SAP)¹ in clinical testing

Includes SAP Test Patterns

Performance equivalent to SAP with excellent repeatability²

Less Patient Fatigue

Random, binocular testing creates a comfortable and fluid patient experience

1. Comparison between New Perimetry Device (IMOvifa®) and Humphrey Field Analyzer" M Eslani, T Nishida, S Moghimi, JM Arias, C Vasile,

MYAH®

Optical Biometry + Corneal Topography

OVERVIEW

Rx/AL Trend

Track changes in axial length, refractive error, and corneal power

Corneal Analysis & Meibography

Capture corneal topography, aberrometry, white-to-white measurements, and meibomian gland imaging

Maximize Your Investment

Utilize the Topcon Practice Implementation and Marketing Toolkit to leverage the full benefits of the MYAH device

SeeNa[™]

Optical Biometry & Topography System

OVERVIEW

9-in-1 Features

Capture nine key measurements to calculate IOL power and predict effective lens position with a single acquisition

Seamless, Secure Connectivity

Integration to Eyetelligence™ Surgical Planning Software enables secure data management and enhanced efficiency

* Distributed by Bausch+Lomb

KR-800S

Auto Kerato-Refractometer with Subjective and Glare Testing

OVERVIEW

5-in-1 Device

Integrate objective, subjective, contrast sensitivity, visual acuity, and glare testing in one device

Easy to Use Obtain quick and accurate readings with a user-friendly design

ADVANCED TESTING

Corneal Analyzer

OVERVIEW

Corneal Topography

Map corneal curvature and see visitto-visit changes in keratometry, apical curvature, and corneal symmetry

Meibomian Gland Analysis

Image the meibomian glands of the upper and lower eyelids

Contact Lens Software

Design contact lenses utilizing fitting simulation software and on-board contact lens database compatible with major manufacturers

SLIT LAMPS

SL-D Series

Digital Slit Lamps

Topcon's slit lamp series features quality craftsmanship and ergonomic design, providing a comprehensive range of products to enhance clinical observation.

OVERVIEW

Precision Optics

Topcon's superior slit lamp optics are the result of over 90 years of experience in manufacturing, delivering exceptional quality and a bright, clear view

LED Illumination

LED lighting lasts substantially longer than conventional halogen bulbs

Digital Ready

The DC-4 digital camera attachment captures color and monochrome images as well as videos of the eye

KR-800 Simple to Use, Auto Kerato-Refractometer

KR-800PA Auto Kerato-Refractometer with Corneal Mapping and Auto Alignment

Compatible with RDx Ocular Telehealth Platform (See page 11)

REFRACTION

CV-5000S

Digital Phoropter

CV-5000S makes refraction faster, offers an ergonomic alternative to manual refraction and elevates the patient experience.

OVERVIEW

Ergonomic

Enjoy a comfortable alternative to manual refraction with the one-dial controller

Efficient

Reduce overall refraction time with highspeed lens disc rotation

Dynamic Patient Experience

Instantly demonstrate the difference between old and new prescriptions to help patients make their purchasing decision

EXAM LANE

RDx[®]

Comprehensive eye care through innovative telehealth technology.

Provide seamless and real-time remote eye exams, by expanding the boundaries of the office and tackling barriers of entry.

OVERVIEW

Remote Access to Quality Care

Topcon's CV-5000S automated phoropter remotely integrates with RDx, allowing refractions to be conducted from any location

Automation and Practice Efficiency

Utilize the benefits of integrated remote video conferences between patients, providers, and staff to enable seamless communication and real-time control of devices within the practice

Patient Convenience

Deliver quality eye exams to patients at a time and place that is most convenient for their needs

Efficiency

Seamlessly connect with EMR to send patient information directly to and from connected instruments

Comprehensive Analysis

DIGITAL HEALTH

Clinical Data Management + Communication Simplified.

Simple and intuitive platform that streamlines your practice workflow and organizes your data so you can focus on what matters.

OVERVIEW

Provide a complete picture of the patient's eye health on a single screen

Customizable

Easily customize clinical views and group them by disease entity to show only the information needed to make a diagnosis or treatment decision

CUSTOMER SERVICE

Excellence in Customer Service

Topcon Healthcare has a dedicated team of professionals nationwide who provide responsive phone support, in-house repair, field service, and comprehensive training.

Our customer care center is available by phone Monday - Friday from 8:00am -8:00pm EST and Saturdays 9am-5pm EST.

Call us toll-free at 1-866-922-6278 or visit topconhealthcare.com/support

Available services:

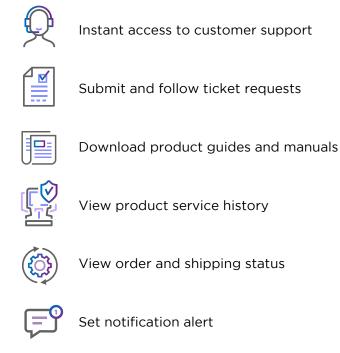

- ✓ Asset management
- Preventative maintenance
- Equipment relocation and storage
- ✓ Chair reupholstery
- ✓ Manual phoropter cleaning

- ✓ Instrument loaners
- ✓ IT services
- ✓ Project management
- ✓ In-house and onsite repair
- Installation and training
