# Coplanar vs Dual Depth

Mains & Secondaries	Plaid can be specified with continuous depth across the entire system, or the Mains and Secondaries can have varying dimensions giving the system multiple depths.	COPLANAR	DUAL DEPTH
Coplanar	This option creates a uniform look across the ceiling, using the same depth across both Mains and Secondaries.		
Dual Depth	Create a dynamic look where Plaid has varying depth between the Mains and Secondaries.		
	Please let the Turf team know about the desired width and depth combinations, one for the Mains and another for the Secondaries.

## **Profile Options**

Profile Perimeter	Plaid is designed with a range of profile sizes that optimize the use of materials.		MINIMUM DEPTH & MAXIMUM WIDTH	
	Based on the perimeter of the desired section, there are three size tier options.		P = 12"	P = 11"
	P = Baffle Perimeter P = (2 x Depth) + Width	S		
Minimum Profile	3"W × 4"D		<b>↓</b> 4" ─ <b>↓</b>	
Small Range Profile	P ≤ 12″			MINIMUM PROFILE
Medium Range Profile	12" < P ≤ 16"		P = 16"	P = 15"

#### 9mm Colors

Introducing Hues, our new 9mm color palette designed for the senses.

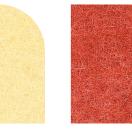

The 9mm PET felt board is used as our primary construction material. Select one of our coordinating neutrals to blend in, or go for a contrasting element with one of our hues.

The process used to create PET felt often results in a heathered effect where multiple tones are present. Slight variations in color should be expected when using this sustainable material.
