Recommended Connections

Connection Spacing

60" OC Max

Spacing varies per project. Baffles require a minimum of two connection points.

Feltlock

Products with Turf's patented Feltlock flex and compress to insert into Unistrut.

P1000T Unistrut, raw galvanized finish or powder-coated, hardware is required.

Painted unistrut may damage Feltlock installations and will void the product warranty.

Cable To Deck

Baffles with embedded cable grippers snap into deck-mounted aircraft cables.

10' aircraft cable supplied by Turf should be trimmed in the field as needed.

Gridlock

The Gridlock attachment flexes to grasp the tee grid.

9/16" or 15/16" flat tee grid is required.

Exposed Magnetic

A powerful attachment to 9/16" or 15/16" tee grid for secure and easy installation.

Layout Considerations

Wall Clearance

Turf recommends a 4" clearance from the wall to our baffles.

Adjacent Baffle Clearance

Turf recommends a 1" gap between all rows of baffles. This clearance supports a uniform look and build.

If you're looking for no clearance between baffles, we can supply hardware to accommodate at an additional cost.

Trim in Field

Contour Baffle ends can be trimmed in field as required.

Please do not trim between baffle connection points or connection pieces.

9mm Colors

Introducing Hues, our new 9mm color palette designed for the senses.

The 9mm PET felt board is used as our primary construction material. Select one of our coordinating neutrals to blend in, or go for a contrasting element with one of our hues.

The process used to create PET felt often results in a heathered effect where multiple tones are present. Slight variations in color should be expected when using this sustainable material.

**Felt Thickness**  
9mm +/-0.5 mm

Monitors and printers vary.  
Please request a material sample to verify felt colors.
