

# Continuous Flowmeter Spinner (CFS)

## PROVIDES ACCURATE FLUID VELOCITY MEASUREMENTS IN COMPLEX WELL COMPLETIONS

### OVERVIEW

The Halliburton Continuous Flowmeter Spinner (CFS) is ideal for measuring fluid velocity in difficult wellbore conditions. Run at the bottom of the tool string, the CFS spins with the direction of flowing liquid and sends the spin-rate information back to the surface. Since the CFS has a very low tool threshold and requires very little fluid movement to spin, it is perfectly suited for low-flow well environments. Customization options are also available, giving an operator the flexibility to monitor fast-flow operations with a different model section.

The spinner is mounted on precision roller bearings, and turns as fluid moves past it. This rotation is converted to signal pulses by zero-drag Hall-effect sensors. The pulses are then used to calculate fluid velocity and fluid direction (up or down flow). The flowmeter requires very little energy to initiate motion, and is ideal for low flow-rate surveys. The design and mechanical construction of the spinner assembly are optimized to cope with very fast flow, sand production, and high-viscosity liquids. Each model has a different size housing and impeller, and should be chosen to suit the well completion and flow regime.

### BENEFITS

- » Provides accurate fluid velocity measurements in complex well completions and flow regimes
- » Offers flexibility to monitor wells with varying ranges of velocity

### FEATURES

- » Rugged spinner housing protects against debris
- » Fully combinable with all Ultrawire™ production-logging tools
- » Spinner shroud available in a range of sizes: 1⅜ in., 1½ in., 1⅞ in., 2½ in., and 3⅞ in. (35 mm, 38 mm, 43 mm, 54 mm, and 79 mm)
- » Surface readout or memory-logging operations

HAL24630

## Continuous Flowmeter Spinner (CFS)

<b>Temperature Rating</b>	350°F (177°C)
<b>Pressure Rating</b>	15,000 psi (103.4 MPa)
<b>Tool Diameter</b>	1 <sup>3</sup> / <sub>8</sub> in. (35 mm) and 1 <sup>11</sup> / <sub>16</sub> in. (43 mm)
<b>Tool Length (depends on CFS model)</b>	± 8 in. (± 203 mm)
<b>Tool Weight (depends on CFS model)</b>	± 1.7 lb (± 0.77 kg)
<b>Sensor Measure Point (from the bottom of the tool)</b>	2.5 in. (64 mm)
<b>Materials</b>	Corrosion resistant throughout
<b>Spinner Shroud OD (depends on CFS model)</b>	1 <sup>3</sup> / <sub>8</sub> in., 1 <sup>1</sup> / <sub>2</sub> in., 1 <sup>11</sup> / <sub>16</sub> in., 2 <sup>1</sup> / <sub>8</sub> in., and 3 <sup>1</sup> / <sub>8</sub> in. (35 mm, 38 mm, 43 mm, 54 mm, and 79 mm)
<b>Output</b>	10 pulses/revolution (directional)
<b>Spinner Threshold</b>	5 ft/min (0.03 m/s)
<b>Maximum Fluid Velocity</b>	>2,500 ft/min (>12.7 m/s)
