What's New in Destiny 18.2

Welcome to Destiny version 18.2. Destiny is a complete library and resource management system that can be accessed from anywhere, 24/7, helping to strengthen the bond between the library, classroom and home. This new version incorporates many of your suggestions, and we are confident the enhanced features and functions will meet your needs. We continue to improve Destiny for today’s students, teachers and librarians. Destiny version 18.2 features are available in Destiny Library Manager and Destiny Discover to keep Destiny current with technical, library and market trends.

We know you will want to begin using these enhancements right away!

Notes:
- To update to the latest version of Destiny, you must be on Destiny v12.0 or later. If you have a version of Destiny earlier than v12.0, you must first update to Destiny v12.0 before you can update to v18.2.
- Some Destiny Discover features will not be completely visible until you upgrade to Destiny v18.2.

Following are descriptions of the new features in Destiny v18.2.
All Destiny Products

Destiny Auto-Quarantine

To safely handle resources, districts can enable auto-quarantine for Library Manager and Resource Manager. When items are checked in, their Status will be set to In Quarantine for the pre-set number of days.

Enable Quarantine

For Library Manager and/or Resource Manager, Destiny Administrators can enter a number of calendar days in the Quarantine returned copies for field to quarantine library or resource items for that amount of time.

Circulate Quarantined Copies and Items

If the Library Manager quarantine setting is enabled, when a copy is checked in, the status becomes In Quarantine. Users with the Override library blocks permission can select the Check in quarantined copies checkbox in Circulation > Check In to remove a copy from quarantine, thus making the status Available. This permission also lets users override the block to check out copies with an In Quarantine status.

If the Resource Manager quarantine setting is enabled, when an item is checked in, the status becomes In Quarantine. Users with the Override resource blocks permission can check in a quarantined item in Circulation > Check In Items. Likewise, this permission will let users override the blocks to check out items with an In Quarantine status.
Destiny Library Manager

Share Titles to an LMS or Other Learning Platform

Flexible access to learning resources is more important than ever. Use Destiny's new export option to give students convenient access to library resources via another learning platform, such as a learning management system (LMS) or learning object repository (LOR).

The new export file format follows the IMS Global® Learning Consortium's Thin Common Cartridge™ standard, which lets you integrate Destiny Discover resources into compliant learning systems. For background information on the Thin Common Cartridge standard, visit [www.imsglobal.org/cc](http://www.imsglobal.org/cc).

You can create a file with all library resources, or limit it to Follett digital materials, a particular copy category, list of barcodes or Resource List to then import into another learning system.

![Export Title Screen](image)

When students launch Follett eBooks or Follett Audiobooks from the platform you added it to, if a copy is available, it opens the book without any additional sign-on.

If any of the following types of resources are shared, the link takes you to the title’s details in Destiny Discover:

- A digital resource with no available copies
- A digital resource from another vendor
- Physical library resources
Requirements
To use this feature, Destiny must be configured as a Learning Tools Interoperability® (LTI) tool in the learning system you are adding resources to.
For more information, see Export Titles and Single Sign-On (SSO).

Destiny Discover
You can also share titles directly from Destiny Discover. To stay on top of the latest Destiny Discover releases, visit the What's New page in Destiny Discover Help.
Destiny Discover

Make a Wish for Titles

You can now allow your patrons to request a title in Destiny Discover by making a wish. Use this information when making purchasing decisions. This feature requires Destiny Back Office version 18.2.

Librarians can view Wish Lists in Destiny Back Office. Select Reports > Library Reports, and then under Catalog -- Titles & Copies, select Wish Lists.

For more information, see Make a Wish.

Coming Soon

Did you know Destiny Discover is updated regularly with new features and enhancements?

Recent updates include:

- New homepage customization options
- Ability to limit display to your library’s digital content
