

Biomass Kit for 3M™ Systems

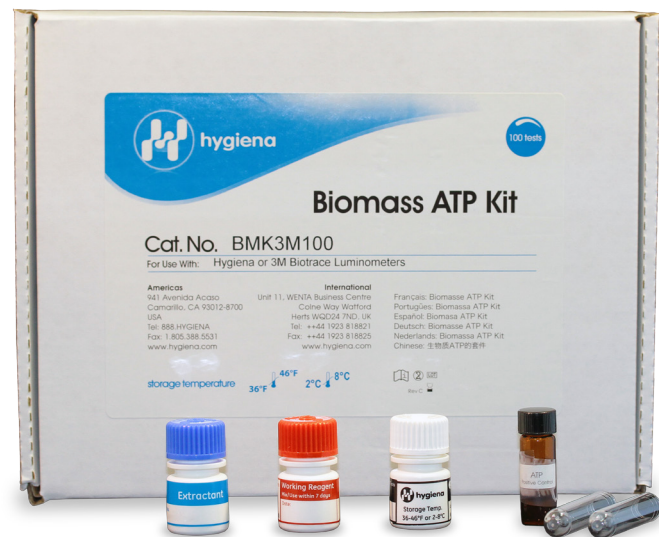

The Hygiena™ Biomass Kit is a high-precision test kit for measuring total and free ATP in liquid samples. The kit, which replaces the Multi-trace™ Kit, enables sample cleanup in the case of high-quenching particulates or fibers in aqueous samples.

Benefits:

- Detects microbial and non-microbial contamination
- Features Hygiena's patented liquid-stable reagent for more repeatable results
- Buffer, extractant and stable reagent provide extended shelf life, greater accuracy
- Costs up to 30% less than the 3M™ Multi-trace™ Kit
- Flexibility when dealing with challenging samples
- 12-month shelf life at (2 – 8 °C)
- Replaces the Multi-trace™ Kit with no need to adjust threshold levels
- Compatible with Clean-Trace™ or BioTrace™ luminometers.

Additional Requirements:

- Luminometer
(Clean-Trace™ or BioTrace™)
- Hygiena Hold-Rite applicator (HR001)
- Pipette and ATP free tips
for 100 µl sample volume

3M™, Clean-Trace™, and Multi-trace™ are trademarks of 3M Company.

Catalog No.	Description	Quantity
BMK3M100	Biomass Kit for 3M Cleantrace™ and BioTrace™ luminometers	1 kit
HR001	Hold-Rite Applicator	1
