

Understanding Audio Speakers

Give every event participant the ideal listening experience with our loudspeaker options. Learn more about the speakers we offer, curated by our audio experts to suit your event type, goals and budget.

Column Speakers

Deliver high-quality sound with enhanced clarity across a wider range. Their sleek, unobtrusive design minimizes view obstruction and are quick and easy to set up.

Ideal for:

- Breakouts
- Small to mid-size ballrooms
- Social events
- Spaces where you desire clear sound without bulky equipment

Placement and reach:

- Position on the ground for easy integration into most event spaces
- 50-70 ft., 130° range of coverage
- Add additional units to larger rooms to expand sound coverage area.

Line Array Speakers

Provide powerful premium-quality sound in performance-focused venues, offering optimal coverage in suspended ("flown") or stacked ("fixed") configurations.

Ideal for:

- Large conferences
- Ballrooms
- Concerts
- Events that require larger audio systems for extensive coverage

Placement and reach:

- Stack on the ground if rigging isn't an option
- 100 ft.+, 100-120° range of coverage
- Add additional units to larger rooms to expand sound coverage area.

Point Source Speakers

Offer targeted coverage in specific event situations that require compact, versatile loudspeakers. They are best used as Center Fill Speakers or Foldback Monitors.

Ideal for:

- Front-row event participants
- Presenters and performers

Placement and reach:

- Position Center Fills at front of stage to cover the front rows of audience
- Place Foldback Monitors on or near the stage facing presenters to hear themselves and others
- 20 ft., 60° range of coverage
- Add additional units to larger stages to expand sound coverage area.
