catchbox

Throwable Microphone

Large sessions typically have a question/answer period at some point.

For attendees, there can be some lag time waiting for a microphone to be passed around.

Catchbox's soft-surround, turns it into a custom-branded, fun, throwable microphone.

The tech is also very smart. It's been engineered to automatically mute when it flies through the air. Catchbox has been a part of the events industry for years and remains popular at meetings and conventions.

Great For:

- > Promoting engagement
- > Encouraging discussion
- > Eliminating lag time
- > Providing one more branding opportunity for your event

To learn more about this innovative technology and how Encore can enhance engagement at your next event, contact your local Encore representative or call (866) 719-4467.
